

UKRAINE EMERGENCY

UNHCR Operational Update

10 July 2026

On 2 July, Kyiv came under a massive Russian aerial attack with 74 missiles and almost 500 drones. Authorities reported 31 people killed and dozens injured, while homes and critical civilian infrastructure were damaged. UNHCR and local NGO partners responded with urgent emergency assistance to impacted families. © UNHCR/Dmytro Babenko

KEY FIGURES:

1.25 million

multi-sectoral services delivered to people in need in **2025***** (in addition to **1.7M** in 2024, **4.3M** in 2022 & **2.6M** in 2023)

10.8 million

people in need of humanitarian assistance and protection in 2026 (source: [2026 HNRP](#))

3.6 million

people prioritised (from 4.1M) for humanitarian assistance in the [2026 HNRP](#)

2.1 million

multi-sectoral services UNHCR aims to provide to internally displaced, returnees, and war-affected people in **2026*****

***People may receive multiple forms of assistance and services.

OPERATIONAL CONTEXT & HIGHLIGHTS:

- **The Russian Federation has significantly intensified aerial attacks against Ukraine, with Kyiv and other cities subjected to multiple large-scale strikes.** The UN HRMMU [reported](#) that civilian casualties in Ukraine were higher in June 2026 than in any other month since April 2022, with at least 293 civilians killed and 1,990 injured. This concerning trend appears to be continuing into July. A massive attack on Kyiv overnight on 1-2 July killed 31 people. Only a few days later, another attack on 5-6 July killed 19 people in Kyiv city and ten people in the Kyiv region. So far this year, Russian Armed Forces launched over 520 ballistic missiles at Ukraine, more than twice as many as in the same period in 2025, according to Ukraine air force data.
- **The Ukraine Recovery Conference (URC)** took place in Gdańsk, Poland, on 25 and 26 June. UNHCR's Representative Bernadette Castel-Hollingsworth [attended](#), joining key discussions with partners, UN agencies and Government counterparts. The Representative also spoke at a [side event](#) on recovery and future returns of displaced Ukrainians – highlighting the need for people-centered investments in housing, jobs and services in Ukraine.
- Marking the 75th anniversary of the 1951 Refugee Convention and the 65th anniversary of the 1961 Convention on the Reduction of Statelessness – and ahead of World Refugee Day in June – **UNHCR together with the Ministry of Foreign Affairs launched a photo exhibition in Kyiv** highlighting the stories of refugees and stateless people in Ukraine. Read more [here](#).
- In the fifth year since the start of the Russian full-scale invasion of Ukraine, and more than 12 years since the war began, **UNHCR's programme in Ukraine increasingly aims to help war-affected people and communities to recover, and displaced people to find durable solutions**, particularly through housing and strategic protection advocacy.

2026 RESPONSE in NUMBERS*:

(Delivered with partners from 1 January–30 June 2026)

481,316

Multi-sectoral services delivered to people in need in 2026

All sectorial achievements/targets refer to individuals. All reached figures are subject to data cleaning and verification. The Mid-Year Review Process is ongoing and retro-active corrections may occur.

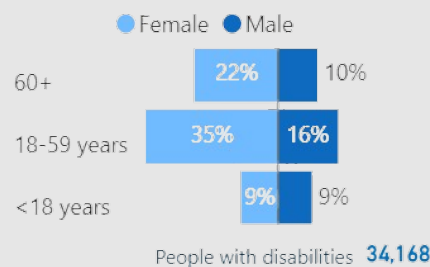

WORKING WITH PARTNERS:

*In alignment with the humanitarian inter-agency and cluster reporting systems, UNHCR and partners will continue to publish narrative and response figures on a monthly basis.

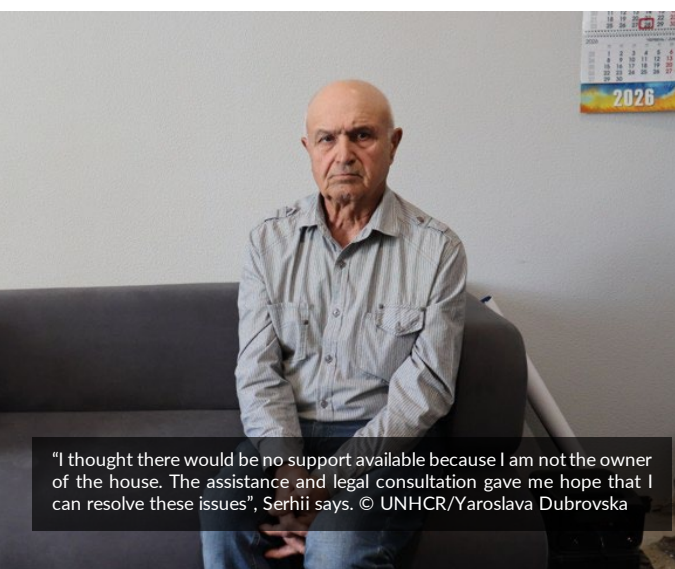

Age, gender and disability breakdown

Emergency Response

- Emergency response to attacks:** Complementing the work of first responders, UNHCR's local NGO partners continue to provide critical emergency shelter materials to people affected by Russian aerial attacks to quickly protect their damaged homes. UNHCR and partners also provide psychosocial support, legal assistance, for example to restore lost documents or apply for state compensation, and cash assistance or essential items to help cover immediate needs. In June, UNHCR and NGO partners delivered emergency shelter materials to **16,449 people (9,086 families)** across Ukraine. In the first half of 2026, **79,985 people (45,097 families)** received emergency shelter assistance – **60.4% are women and girls, and 41.2% are older people** over the age of 60. Most of the emergency shelter support so far this year was provided to households in Dnipropetrovska (27%), Donetsk (18%), Zaporizka (15%), Sumska (15%), Kharkivska (9%), Kyivska (6%) and Khersonska (6%) oblasts. In addition, UNHCR has provided emergency shelter assistance to **612** damaged facilities so far this year, including medical facilities, schools, and administrative or heritage buildings, allowing them to remain operational while more durable repairs can take place. Among others, this includes emergency shelter kits [provided](#) through UNHCR's NGO partner Rokada to restore the roof of the Kyiv Pechersk Lavra following the attack on [15 June](#).
- In response to the largescale attacks on Kyiv just days apart on [2 July](#) and [6 July](#),** UNHCR and partners supported around 890 families and nine facilities with emergency shelter repair materials, over 350 people received psychosocial support, and around 280 people have so far received legal aid to support access to state compensation or restore lost documents, in addition to various other social consultations.
- Evacuations and response:** UNHCR and partners continue to respond to people forcibly displaced and evacuated from frontline regions. Since the start of 2026, [71,300 evacuees](#), including almost 2,900 people with a disability, have passed through UNHCR-supported transit centres (TCs), but the actual number of people displaced is substantially higher, as many flee without seeking support at the transit facilities. In June, around **15,200 IDPs** passed through TCs – more than any month this year – 51% were women and girls, and 37% older people above the age of 60. The majority were displaced from Donetsk oblast, and 40% passed through the Lozova TC in Kharkivska oblast. This is an increase compared to April and May, during which around 11,000 people passed through the TCs each month. UNHCR and NGO partners are supporting newly evacuated and war-affected families with essential items, emergency shelter materials, cash assistance, and legal and psychosocial support.

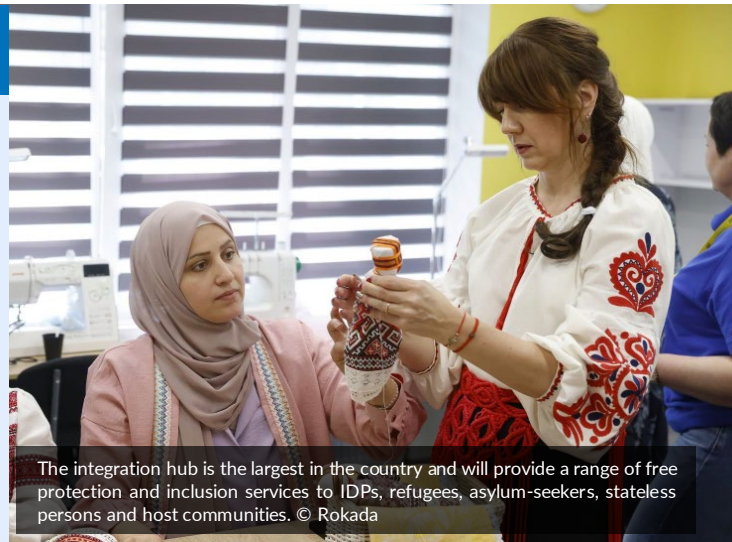

How emergency shelter materials, cash assistance and legal aid provide critical complementary support after attacks

Earlier this year, Serhii's home in Kryvyi Rih, Dnipropetrovska oblast, was damaged during a drone attack. Several windows and his entrance door were destroyed. Immediately after the attack, UNHCR's local NGO partner Proliska provided emergency shelter materials to help temporarily cover the damaged windows and protect the house. Later, Serhii was informed that he was not eligible for state compensation for his damaged home because he was not the legal owner of the house. This was due to unresolved inheritance issues following the passing of his wife. UNHCR's local NGO partner Right to Protection then registered Serhii to receive cash assistance and documented the damage to his home. He received the cash assistance within two weeks, which enabled him to partially cover the cost of replacing the damaged windows so he could stay in his home. In addition, Serhii is receiving legal counselling to help him navigate inheritance procedures, which may help him become eligible for state support in the future, among others.

"I thought there would be no support available because I am not the owner of the house. The assistance and legal consultation gave me hope that I can resolve these issues", Serhii says. © UNHCR/Yaroslava Dubrovskaya

New Integration Hub in Kyiv will provide critical support services to displaced people

The largest Integration Hub in Ukraine was [inaugurated](#) in Kyiv on 17 June together with the Mayor of Kyiv, NGO Rokada and UNHCR. Developed by the Kyiv City Centre for Comprehensive Assistance to IDPs, with support from the Kyiv City State Administration, UNHCR and its local NGO partner Rokada, the Hub will provide free integrated protection and inclusion services for IDPs, refugees, asylum-seekers, stateless persons and host communities. The building renovation works were carried out by the City Administration, while UNHCR and Rokada helped develop the concept and design of the hub, in addition to providing equipment, furniture and an elevator to ensure accessibility for people with limited mobility. The Hub will provide individual counselling services, legal and psychological support, guidance on social services, as well as educational courses, creative workshops, and recreational activities, with continued support from Rokada.

The integration hub is the largest in the country and will provide a range of free protection and inclusion services to IDPs, refugees, asylum-seekers, stateless persons and host communities. © Rokada

Protection

- **New State Strategy on Internal Displacement:** On 10 June, in a milestone decision, the Cabinet of Ministers adopted the new five-year State Strategy on Internal Displacement (2026 to 2030) and its Operational Action Plan. The strategy reflects the Government's commitment to transition to a systematic policy on internal displacement and a comprehensive approach to supporting IDPs across Ukraine. In an important step toward strengthening and enabling implementation of the strategy, law No. 12301 on Ensuring the Rights and Freedoms of IDPs, adopted on 1 July, provides the updated legal and normative framework needed to operationalize the strategy's objectives. Advocacy and support for the development of this State Strategy in close cooperation with the Government has been a focus of UNHCR's work over the past year as part of the UN Durable Solutions Initiative led by the UN Resident Coordinator. For more information, read [UNHCR's Policy Brief here](#). In addition, among a series of newly adopted resolutions to advance solutions for displaced people, UNHCR supported the development of the mechanism related to [Resolution 751](#) (adopted 10 June) which introduces a new purchase modality to expand municipal housing stock for IDPs in rural areas.
- **Helpline trends:** In the first half of the year, UNHCR's Helpline, operated by NGO partner Donbas SOS received around **70,000** calls, responding to people's questions and providing information on support services. In 2026, around 78% of callers were women and girls and

43% were older people. Around 57% of callers were IDPs, and 22% reported having a disability or serious medical condition. Calls were received from across the country, with Dnipropetrovska, Kharkivska, Kyivska, Sumska and Zaporizka oblasts being the top five regions with the most callers. The large majority of inquiries (86%) related to cash assistance. In total since 2022, the UNHCR-supported helpline has addressed over **1 million** calls, responding to an average of over 750 calls daily.

Cash Assistance

- From January-June, **UNHCR delivered cash assistance to 86,820 war-affected people (65% are women and girls, and 35% older people)**, totalling over **\$22.8 million**.
- Through the Unified Cash transfer (UCT) approach adopted in April, and in alignment with the four strategic priorities set out in the 2026 HNRP, UNHCR continues to assist vulnerable IDPs, returnees and other vulnerable war-affected people with cash assistance to enable them to meet their basic needs. UNHCR's primary operational focus remains on supporting households affected by evacuation or new displacement (UCT2) and individuals impacted by strikes (UCT3). In June, UNHCR's cash assistance remained highly shock responsive. Around **76%** of individuals assisted received emergency cash following evacuation or new displacement (UCT2), while around **18%** received the cash after being affected by strikes (UCT3). The remaining were assisted through other cash interventions based on assessed needs.

Cash assistance in Ukraine provides a crucial lifeline for displaced people

76-year-old Liubov from Dobropillia, Donetsk oblast, was evacuated by humanitarian volunteers in June 2025 as the security situation in her hometown deteriorated sharply. "It became impossible to stay," she recalls. "Every night we had to run to the basement. During the day, it was dangerous to even walk outside." After leaving Dobropillia, Liubov first arrived in a transit centre in Pavlohrad in Dnipropetrovska oblast in eastern Ukraine, where she and other evacuees were registered and received initial support. To cater to her needs for specialized care, she was then relocated to a crisis social services centre in Khmelnytskyi in central Ukraine that assists and provides accommodation to people who are left alone in difficult life circumstances, including vulnerable displaced people with disabilities. Like many older people displaced by the war, Liubov relies on her modest pension and humanitarian assistance, which is not enough to cover her basic expenses. Cash assistance from UNHCR is crucial in helping to bridge this gap. Read more [here](#).

For Liubov, UNHCR's cash assistance has been a crucial lifeline to make ends meet in displacement. It enables her to cover her needs, particularly her medical expenses. © UNHCR/Alina Kovalenko

CLUSTER RESPONSE UPDATE: Q2 2026

UNHCR's humanitarian response is aligned with the needs and priorities set out in the [Ukraine Humanitarian Needs and Response Plan \(HNRP\)](#). As part of the interagency response in 2026, UNHCR **continues to lead the Protection and Shelter/NFI Clusters**, coordinating the protection, shelter and site coordination and management response by humanitarian partners in Ukraine. UNHCR also remains actively engaged in the **2025-2029 UN Sustainable Development Cooperation Framework (UNSDCF)**, which will support the Government of Ukraine in its reform, recovery and development priorities, and co-leads, with UNDP, Results Group 4 on Governance. In addition, UNHCR actively engages in the **Government's Sectoral Working Group (SWG) on Social Protection**, where it cofacilitates the Social Services Task Force and actively engages in the Nexus Task Force. UNHCR is also part of the **Durable Solutions Initiative** led by the UN Resident Coordinator.

PROTECTION CLUSTER

The Protection Cluster coordinates nearly 200 partners across three coordination hubs. In 2026, Protection Cluster partners aim to reach 2.4 million people with protection services and assistance (2 million people prioritized under the 2026 HNRP).

- **Evacuations:** Following the issuance of the Law 4779-IX on Evacuations, the Protection Cluster developed [Operational Considerations for Humanitarian Organizations](#) and organized sessions on the law and its implications with local partners conducting evacuations and within broader humanitarian fora (ICCG, NGO Platform). The Cluster also participated in the meeting organized by the Ministry of Social Policy, Family and Unity concerning the Law 4779-IX on evacuations, advocating for a more holistic approach to law implementation and by-laws development.
- **Winter preparedness:** The Protection Cluster contributed to the ongoing development of the 2026–2027 Humanitarian Winter Response Plan based on the lessons learned from the 2025–2026 winter response – promoting a community-based protection approach to complement state social services and sectoral winter assistance by strengthening information provision, community outreach, identification and referral of vulnerable individuals, and support to social workers. The proposed approach focuses on reaching people at heightened protection risk who may otherwise fall through gaps in existing response mechanisms, including older people, persons with disabilities, and single caregivers.
- **Collective site monitoring:** In April, the Protection Cluster, jointly with REACH and Cluster partners, [completed the 20th round of the national multisectoral collective site monitoring](#), an exercise funded by UNHCR. More than 1,300 collective sites were assessed, hosting approximately 61,000 people, including 39% older people and 16% children. Of these, around 11,000 were newly displaced people who had arrived within the previous six months. Partners identified more than 2,600 available rooms that could accommodate newly displaced people, including over 700 rooms suitable for people with limited mobility. Notably, 16% of collective sites were providing the state social service *Prytulok* ("Shelter") for people with disabilities in line with Resolution No. 1169. Protection Cluster Sub-National Coordinators are following up on the findings.
- **Transit Centres:** Between April and June (Q2), [more than 37,500 people passed through Transit Centres](#), representing a 12% increase compared to Q1. More than half of all evacuees (20,240 people) came from Donetsk oblast, while the number of people evacuated from Dnipropetrovska and Zaporizka oblasts declined slightly. The Transit Centre in Lozova continued to handle the highest number of arrivals, with more than 17,000 people passing through during the reporting period. As in previous reporting periods, around 89% of people continued their onward movement independently, while 11% required assistance either to board the evacuation train or to access accommodation in a collective site.
- **HNRP reporting:** Partners completed the first round of reporting under the 2026 issue-based HNRP. Between January and March, nearly 200 organizations provided protection assistance (including child protection and GBV services) to approximately 780,000 people nationwide. The most frequently delivered services included life-saving information provision, psychosocial support, legal assistance and individual protection assistance, including transportation. Of all people reached, 34.8% were assisted under Strategic Priority (SP) 1 (frontline response), 31.9% under SP 4 (support to vulnerable groups in protracted displacement), 23.5% under SP 3 (response to strikes), and 11.6% under SP 2 (new displacement response). The response reached almost equal numbers of non-displaced people (51.1%) and IDPs (48.9%).
- **Protection Risk Monitoring System:** The Protection Cluster continued the implementation of the Protection Risk Monitoring System (PRMS), which expands on the former Protection Monitoring Tool. Following the development of tools in Q1, the Protection Cluster conducted field-level training sessions for partners in Odesa, Mykolaiv, Kharkiv, Dnipro, Sumy, Lviv, and Kyiv. The first round of data collection was completed in late May and is analysing findings.
- **Protection case management:** The Cluster continued to support the rollout of the Protection Case Management Information Management System Plus (PCMIMS+), led by IRC, to strengthen harmonized, safe, and structured protection case management across organizations while promoting consistent risk-based intake criteria and data protection standards. In partnership with DRC and the Protection Cluster, IRC delivered the first three-day national training in Kyiv on PCMIMS+.
- **Cash for Protection Training:** In April, the Protection Cluster, jointly with the Global Protection Cluster Cash for Protection Task Team, organized a five-day Cash for Protection (C4P) training in Kyiv for more than 30 participants. The training strengthened partners' capacity to design, implement, and monitor C4P programmes, with a strong focus on practical application and peer learning. It also supported organizations participating in the pilot implementation of the integrated C4P guidance, with lessons learned to inform the further refinement of operational guidance and tools later this year.
- **On Accountability to Affected People,** UNHCR, on behalf of the Protection Cluster, presented 'Feedback trends of Affected People in the Ukraine Humanitarian Response (2025-2026)' at the HCT meeting held on 17 June.

SHELTER/NFI CLUSTER

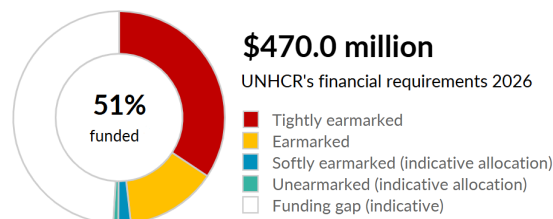

The Shelter and NFI Cluster coordinates 155 partners across four coordination hubs. In 2026, Cluster partners aim to reach 1.4 million people with emergency shelter and NFI assistance, winter assistance, and adequate housing (1.2 million people prioritized).

- **Response reach:** In the first half of 2026, Shelter/NFI Cluster partners continued to provide emergency and recovery-oriented shelter assistance to people affected by hostilities, displacement, evacuations and strikes across Ukraine. Overall, partners reported 445,557 people reached/items delivered under Shelter/NFI indicators between January and June. During Q2 alone, 35 organizations reached 79,674 people across 16 oblasts and supported 40 institutions. Assistance in Q2 reached both internally displaced and non-displaced war-affected people. IDPs represented 60.2% of people reached, while 39.8% were non-displaced. Women and girls accounted for 64% of people reached, and older people represented a significant share at 40%, confirming the continued need for vulnerability-based targeting.
- **Emergency NFI and shelter support remained the largest area of delivery:** From January to June, partners reached 83,138 people with household NFIs and 164,944 people with communal NFI support in collective sites, transit centres, invincibility points and bomb shelters. Emergency shelter support also remained significant, reaching 92,086 people in 2026 to date, including 75,269 people with emergency construction materials and 16,817 people with emergency shelter kits. In Q2, this included 17,141 people supported with household NFIs, 30,880 people reached with communal NFI donations, and over 54,100 people supported with emergency shelter kits or construction materials.
- **Humanitarian repairs and safer living conditions:** In 2026 to date, 40,429 people were supported under humanitarian repair activities, including light, medium and heavy repairs, common space repairs and support to social facilities. This included 22,551 people supported by repairs to social facilities, 7,819 people with in-kind light repairs, 4,127 with in-kind medium repairs, and 3,502 with light repairs using cash or vouchers. In Q2, repair support remained an important part of the response, particularly light and medium repairs, common space repairs and assistance to social facilities.
- **Support to collective sites and temporary accommodation:** Between January and June, 18,514 people were supported under collective site refurbishment activities, including 16,972 people benefiting from refurbishment activities and 1,542 from care and maintenance support. Rental support reached 3,351 people in 2026 to date, including 1,807 people in Q2, helping displaced households access temporary accommodation options.
- **Winter-related assistance and preparedness:** In the first half of 2026, as part of the 2025-2026 winter response, partners reached 76,370 people with winter heating support, including 49,027 people with winter energy cash or vouchers, 16,596 with cash for utilities, 7,980 with in-kind winter energy, and 2,767 with winter heating appliances. Partners also reached 13,403 people with personal insulation support, mainly winter NFIs and winter clothes, and 5,904 people with shelter insulation for substandard houses.
- **Coordination & operational readiness:** The Cluster organized a Humanitarian Repairs Workshop, where partners discussed practical repair challenges, operational bottlenecks and field-tested solutions. The Cluster also completed the winter lessons learned process, established a Winter SOPs Technical Working Group, and published the [2026 Activities Handbook](#) and [Winterization Lessons Learned](#). Hub coordination continued to support emergency readiness, partner stock mapping, and reporting in ActivityInfo and SIDAR. Looking ahead, priorities include maintaining rapid emergency response capacity, strengthening the repair pipeline before winter, supporting collective sites and temporary accommodation options, and keeping older people, IDPs, female-headed households and other vulnerable groups at the centre of the response.

FUNDING UPDATE | 2026

UKRAINE

as of 30 June 2026

UNHCR is grateful for the support from our top government donors and for the generous contributions from individuals and the private sector. Given the immense humanitarian needs, UNHCR continues to seek support to deliver assistance inside Ukraine.

For more information, see the [UNHCR Ukraine Situation Appeal 2026](#) and the [UNHCR Ukraine 2026 Programme Summary](#).
