

Highlights

- Following the 24 June earthquakes of magnitude 7.2 and 7.5 (18:00 local time), **authorities report more than 1,200 aftershocks.**
- Official toll: **4,734 people dead and 16,740 injured.**
- A total of **6,462 people have been rescued.**
- **An additional appeal for US\$298 million was launched to scale up the earthquake response and address the multisectoral needs of 1.3 million people over the next six months.**
- The United Nations system and its partner organizations, in coordination with the Government, are responding with multisectoral actions and will continue to scale up assistance to affected people.

Situation overview

Venezuela is facing a national emergency following two consecutive high-magnitude earthquakes (7.2 and 7.5) that struck on 24 June (18:00 local time) in the north-central region, with the epicentre located along the San Felipe–Yumare–Montalbán axis (Yaracuy/Carabobo). **Authorities report 1,275 aftershocks.**

Twenty days since the earthquakes, authorities report a toll of **4,734 people dead, 16,740 injured and 6,462 rescued since the onset** of the emergency. Authorities also indicated that **17,907 people lost their home.**

The Government response remains focused on search operations, the management of transitional camps and assistance to affected populations. The United Nations and its partner organizations, in coordination with the authorities, continue implementing multisectoral response activities and scaling up assistance. United Nations Under-Secretary-General for Humanitarian Affairs and Emergency Relief Coordinator Tom Fletcher **announced a US\$298 million addendum to the Humanitarian Response Plan aimed at addressing the multisectoral needs of 1.3 million people over the next six months.** This is in addition to the 5.5 million people already targeted under the 2026 Humanitarian Response Plan, which requires US\$632 million in funding.

Impact on infrastructure

- Authorities report at least **856 affected buildings, including 190 that have collapsed.**
- As part of recovery and reconstruction planning, authorities have identified 40 sites in La Guaira State, covering approximately 584,000 square metres, for the development of housing projects intended for affected populations.

- An initial assessment by the United Nations Office for Disaster Risk Reduction (UNDRR) indicates that direct damage to housing and infrastructure amounts to approximately US\$37 billion. Most of the damage, estimated at around US\$24 billion, is concentrated in housing, businesses, schools, hospitals, and public facilities. Meanwhile, preliminary estimates by UNDP indicate direct physical damage of US\$6.7 billion, equivalent to 6 per cent of GDP.

National response

- The Government response remains focused on search and rescue operations, as well as assistance to affected people.
- According to authorities, the response continues with **107 transitional camps supporting affected populations**, with a capacity of **25,152 people and a current occupancy of 20,936 people**. As of 14 July, 40 camps are located in Caracas, 29 in Miranda, 28 in La Guaira, and 10 in Aragua.
- Authorities are advancing a unified registration process for affected families in transitional camps through the collection of biometric and contact information to support assistance management, social support programmes and housing solutions.
- The Government of Venezuela announced the creation of an initial reconstruction fund equivalent to US\$200 million.
- A psychosocial support hotline remains available for affected people: 0800-AYUDA-01.
- A digital [form](#) has been launched by the National Council for Persons with Disabilities (CONAPDIS) to support a timely and inclusive response in affected areas.
- Mechanisms have been established to locate missing persons (www.localizapacientes.com) and to report affected individuals (0-800-RESCATE).
- School activities remain suspended in affected municipalities across the states of Aragua (Santiago Mariño, Girardot, Ocumare de la Costa de Oro and Tovar); Carabobo (Juan José Mora, Puerto Cabello, Naguanagua and Valencia); Falcón (José Laurencio Silva); La Guaira (Vargas); the Capital District (Libertador); and Miranda (Chacao, Baruta, El Hatillo, Sucre, Plaza, Zamora, Acevedo, Brión, Buroz, Páez, Andrés Bello and Pedro Gual).

Situation by state

Capital District (Caracas) and Miranda

- In Chacao municipality, Miranda state, authorities confirmed 68 deaths and the collapse of four buildings. Of the structures assessed, 46 have been classified as red-tagged and are considered uninhabitable.

Response actions: Organizations such as Tinta Violeta, FUNDANA and World Vision are providing protection support to affected families, particularly through psychosocial assistance.

La Guaira

- Authorities and humanitarian organizations continue strengthening the response in La Guaira's transitional camps through the expansion of multisectoral services, improvements in accommodation conditions and coordinated assistance management. The distribution of essential items, food assistance, protection activities, health and psychosocial support interventions, as well as actions to improve access to safe water, sanitation, connectivity and community infrastructure, continue.

Carabobo and Yaracuy (epicentral zone)

- In Carabobo, the most significant impacts continue to be concentrated in Juan José Mora municipality (Morón parish). In Yaracuy, particularly in Veroes municipality and other localities near the epicentral area, homes have been reported as destroyed or at high risk. Recent assessments have identified priority needs in protection, mental health and psychosocial support, health, shelter, water, sanitation and hygiene (WASH), and food security.

Response actions: Five organizations (Venezuelan Red Cross, CESAP, Tierra Viva, Cáritas Morón and Empodérame) are providing response in health, food, water and the distribution of humanitarian assistance.

Falcón (Tucacas – Silva municipality)

- The emergency remains concentrated in Silva Municipality (Tucacas and Boca de Aroa). A magnitude 3.3 earthquake with its epicentre in Boca de Aroa renewed concerns over the weekend and prompted preventive evacuations along the eastern coast of the state. Soil liquefaction associated with the two earthquakes continues to affect 87 houses in the parish, impacting 252 people.
- Boca de Yaracuy Bridge remains the most severely damaged transport infrastructure, and plans are underway to establish a temporary detour while reconstruction takes place. La Pava, El Paují and Punta Brava bridges remain operational under speed restrictions and controls on heavy vehicle traffic. Technical teams continue monitoring water levels in the Aroa River and Los Ingleses channel due to the risk of seasonal flooding, amid a multi-hazard scenario.

Response actions: Protection Cluster training activities continue, alongside water, sanitation and hygiene (WASH) interventions and psychosocial support activities in Boca de Aroa and Palmasola, implemented by ACH, Azul Positivo, IOM, Centroccidente, ODISEF and AVSI in coordination with regional authorities. Training on psychological first aid requested by Civil Protection for approximately 300 officials is also progressing.

Other states

- **Apure:** Approximately 250 displaced people from the central coastal region remain in the state. The Local Coordination Forum (LCF) continues to monitor the situation and provide multisectoral assistance, including psychological first aid.
- **Bolívar:** Response efforts for families arriving in the state continue. VEN 911 maintains reception, registration and comprehensive assistance mechanisms, including psychosocial support and medical assessments, while institutional response capacity is being strengthened through psychological first aid training for officials. Temporary accommodation remains available for 41 displaced families (127 people, including 60 adults, 10 older persons, 42 children and 15 adolescents), with the VEN 911 facility in Caroní serving as the main transitional camp. Coordination between authorities and humanitarian actors continues to strengthen case follow-up and assistance to affected families.
- **Delta Amacuro:** Preparations are being reinforced to assist affected people expected to arrive in the state on 15 July. Planned actions include the provision of immediate food assistance for the first 72 hours by WFP, the distribution of hygiene kits by Cáritas Delta Amacuro, and food baskets for families with children by World Vision. Tierra Viva is also assessing the distribution of children's kits. Together with UNICEF, mechanisms are being reviewed to provide education kits to out-of-school children and facilitate their enrolment in alternative learning spaces. The inclusion of reunified families in WFP food assistance programmes is also under consideration. In addition, the Directorate of Social Development is being trained in the use of a registration tool.
- **Sucre:** Cáritas Carúpano trained more than 241 people from various institutions in psychological first aid, in coordination with the Carúpano Municipal Government through the Fundación Carúpano.
- **Táchira:** Mobile teams from IOM and ODISEF assisted 11 people on the move at the San Cristóbal bus terminal (five women, three men and three children), providing psychological first aid and dignity kits.
- **Zulia:** Triage and assistance for displaced people continue at the Maracaibo bus terminal, in coordination with ASONACOP and the Venezuelan Red Cross, to facilitate safe transportation.
- **Trujillo and Lara:** Local Coordination Forums remain active, and previously reported monitoring and relief item collection activities continue, including follow-up on assistance and protection risks affecting people on the move.

Humanitarian coordination

- OCHA, together with the Humanitarian Coordinator and in coordination with national authorities, continues to coordinate the humanitarian response with the United Nations and partner organizations, prioritizing actions in health, shelter, food security, WASH, logistics and protection.

- UNDAC and OCHA continued supporting Civil Protection in strengthening emergency coordination and information management capacities, including technical exchanges on USAR coordination mechanisms and operational tracking tools.
- A total of 71 search and rescue teams from 31 countries, comprising 2,786 personnel and 216 search dogs, were deployed to the worst-affected areas in support of rescue operations. The total includes teams that are currently being demobilized.
- OCHA continued strengthening coordination with the private sector to support response and early recovery efforts, promoting engagement with specialized actors in areas such as logistics, debris management, infrastructure rehabilitation and reconstruction planning through existing coordination mechanisms between the United Nations and the private sector.
- Venezuelan authorities requested the activation of the Post-Disaster Needs Assessment (PDNA) within the framework of the United Nations system and with the support of UNDP. In line with the internationally recognized PDNA methodology, the corresponding coordination efforts with relevant counterparts will be advanced.
- Authorities informed the activation of a special mechanism to expedite the processing of a “Work Visa for Special Situations” through the Ministry of Foreign Affairs. The procedure will be carried out online under the coordination of the Office of the Vice Minister for Multilateral Affairs and the Consular Affairs Office. It is intended for foreign personnel of international organizations, as well as United Nations staff, deploying to Venezuela in support of the response to the earthquake emergency.

Initial humanitarian response

Food Security

- Since the beginning of the emergency response, **WFP has reached 67,520 people with food assistance**. On 14 July, WFP continued supporting populations affected by the earthquake through the distribution of family food baskets and the provision of hot meals. A total of 750 family food baskets were distributed in communities across Sucre parish in Libertador municipality (Distrito Capital) and Carlos Soublette parish (La Guaira), reaching 3,000 people. In addition, 125 family food baskets were provided to support meal preparation in temporary shelters located in Catia La Mar and Carlos Soublette parish, benefiting 500 people. These baskets contain essential dry food commodities and cover approximately 75 percent of household food requirements for 30 days.
- Furthermore, through its partners, WFP provided 6,756 hot meals (lunch and dinner) for approximately 3,400 people across three transitional camps: the José María Vargas Sports Stadium, the César Nieves Baseball Stadium, and the Playa Grande community, helping ensure continued access to food for displaced and affected families.

Health

- As of 12 July, 22 international Emergency Medical Teams (EMTs) had been deployed, were mobilizing or were demobilizing in earthquake-affected areas, supporting the health response through emergency medical care, field hospitals, mobile health services and specialized assistance, and complementing national capacities.
- IOM has provided health services to 4,640 people across priority transitional camps in La Guaira.
- UNICEF continued operating its health point in the Playa Grande transitional camp, where it provided care to 21 people (eight women, nine men, two girls and two boys). UNICEF also announced that, as of 15 July, the facility will be dedicated exclusively to immunization activities to strengthen vaccination coverage within the transitorial camp.
- Through its partner Ven Da Tu Mano (VDTM), UNFPA delivered sexual and reproductive health (SRH) services in the José María Vargas Sports Complex, César Nieves Stadium and Playa Grande transitional camps, reaching 125 people through individual consultations. During the reporting period, teams conducted 31 antenatal care visits, inserted 84 subdermal contraceptive implants, and administered 10 injectable contraceptives. In addition, 172 SRH counselling and awareness-raising sessions were carried out.

- In the Playa Grande transitional camp, Project HOPE conducted 39 medical consultations and distributed medicines, while Ven Da Tu Mano provided 69 primary health-care consultations, including general medicine, paediatrics, gynaecology and internal medicine.
- The Spanish Red Cross established an emergency clinic in La Guaira, providing health services to 200 people through service points located at the baseball field and San José Hospital. The main needs addressed included chronic diseases, earthquake-related injuries and mental health support. The operation is being implemented in coordination with the Venezuelan Red Cross and continues to provide assistance to affected populations.
- Fundación Proyecto Maniapure (FPM) conducted a multidisciplinary mobile health outreach in Punta Care community (Naiguatá parish, La Guaira), providing 82 services to 76 people. Services included primary health care, internal medicine, family medicine, obstetrics and gynaecology, nutrition, physiotherapy, mental health and psychosocial support (MHPSS), sexual and reproductive health (SRH), and the distribution of medicines. Assessments identified a high demand for care related to chronic conditions, particularly hypertension and diabetes among older persons, as well as cases of diarrhoeal diseases. Hygiene kits were also distributed based on identified needs.
- International Medical Corps (IMC) continues to deploy Mobile Medical Units (MMUs) across La Guaira State, providing free medical consultations, medicines and mental health services through three service points: the La Lucha MMU, located at Farmatodo in Catia La Mar; the Playa Grande MMU, located at Farmatodo in Playa Grande; and the Type 1 EMT, located at the Catia La Mar Passenger Terminal near Dr. Alfredo Machado Outpatient Clinic. IMC also continues to cover affected communities and other priority locations to strengthen health response capacity. Teams include three general practitioners, three nurses, two paediatricians, one obstetrics and gynaecology specialist, support staff, and Mental Health and Psychosocial Support (MHPSS) personnel.
- Between 1 and 13 July 2026, IMC's mobile medical units conducted a total of 1,408 consultations in earthquake-affected communities in La Guaira. Non-communicable diseases (NCDs) accounted for the largest proportion of consultations, with 656 cases (46.6 per cent), followed by communicable diseases, with 526 consultations (37.4 per cent). In addition, teams provided 90 mental health and psychosocial support consultations (6.4 per cent), 86 sexual and reproductive health consultations (6.1 per cent) and 50 trauma and injury consultations (3.6 per cent). These figures indicate sustained demand for primary health care, chronic disease management, communicable disease surveillance, sexual and reproductive health services, psychosocial support and injury care, underscoring the importance of maintaining essential services and community follow-up in the most heavily affected areas.

Logistics and Telecommunications

- The Logistics Working Group (LWG) supported the transportation of medical supplies in La Guaira for Médecins du Monde through common logistics services provided free of charge. Coordination with partners continues to facilitate the provision of storage and transport services in line with the LWG's available capacities.

Nutrition

- UNICEF established three breastfeeding support spaces in three transitional camps, providing guidance and assistance to breastfeeding mothers.

Protection (including Children and Gender-Based Violence)

- IOM has provided protection assistance to 216 people through the transitional camps supported by the organization.
- UNHCR continued providing legal counselling, psychosocial support, documentation assistance and referrals to specialized services in transitional camps across La Guaira. On 14 July, a total of 51 people, including children and adolescents, participated in protection activities, legal assistance,

case management, psychosocial support, counselling and referrals to specialized services in the Playa Grande, César Nieves Stadium and José María Vargas Sports Complex transitional camps.

- UNHCR supported coordination among government institutions responsible for the management and handling of protection cases that will provide services in the César Nieves Stadium transitional camp. As part of these efforts, referral pathways were strengthened and a directory of focal points was established to facilitate affected populations' access to specialized protection services.
- Through its partner FUNDAINIL, UNICEF provided protection services in the Playa Grande transitional camp, reaching 40 children and adolescents and 12 adults through Child-Friendly Spaces, recreational, sports and play-based activities, as well as awareness-raising activities on the prevention of child sexual abuse, the right to positive treatment and positive parenting. One case was also referred to the child protection system.
- UNFPA carried out gender-based violence (GBV) prevention and response activities in the José María Vargas Sports Complex, César Nieves Stadium and Playa Grande transitional camps, reaching 94 people through community awareness-raising activities, including adolescents, pregnant women and breastfeeding women. In addition, UNFPA provided five psychosocial support interventions, followed up on two protection cases, and conducted awareness-raising activities on safe referral mechanisms and access to specialized services.

Shelter and Non-Food Items

- Since the onset of the earthquake response, IOM has supported the management and coordination of five identified transitional camps in La Guaira, reaching 6,290 unique individuals through the delivery of 9,876 services. Activities include site management and coordination, registration, community engagement, information management and case referrals, facilitating displaced populations' access to essential services.
- In parallel, IOM continues to support improvements in transitional camps, including shelter upgrades and enhancements to basic site infrastructure. The organization is also strengthening coordination with authorities and humanitarian partners to help improve living conditions and facilitate affected families' access to assistance. As part of the effort, IOM has distributed core relief items to 4,244 people.
- To date, in the José María Vargas Sports Complex transitional camp, UNHCR has installed a total of 30 floodlights to improve lighting in communal areas and mitigate protection risks.

Water, Sanitation and Hygiene (WASH)

- UNICEF and its partners continue to provide 80,000 litres of safe water per day across the three identified transitional camps in La Guaira, benefiting approximately 3,500 people. In addition, as of 12 July, more than 1,730 hygiene kits had been distributed, reaching over 6,900 people.
- UNICEF also continues to strengthen sanitation and hygiene conditions in transitional camps through the installation of at least 86 portable toilets and 48 handwashing stations, as well as the regular cleaning and maintenance of these facilities. As of 12 July, UNICEF had also distributed more than 300 waste containers, along with garbage bags and basic cleaning supplies, and continues to support hygiene promotion activities.
- International Medical Corps (IMC) continues to support access to safe water through the provision of drinking water via water trucks.

Humanitarian financing and contributions

- The United Nations humanitarian chief, Tom Fletcher, announced an **additional appeal under the Humanitarian Response Plan for Venezuela**. The appeal outlines the multisectoral needs of 1.3 million people over the next six months. To reach those in need, US\$298 million is required, in addition to the US\$632 million requested at the beginning of the year.
- **IOM** launched a US\$98 million appeal to assist 850,000 people and support 140 entities over the next six months. **PAHO/WHO** launched an emergency appeal for nearly US\$24 million to support health response and early recovery activities over the next six months and released US\$1.5 million from the Contingency Fund for Emergencies. **WFP launched an initial appeal for US\$80 million**

to provide food assistance to 500,000 people over a six-month period. UNHCR requires US\$14.8 million to support up to 30,000 affected people over the next six months.

- A shipment from **Switzerland** arrived on 13 July carrying one metric ton of medical supplies.
- The Government of **Italy** allocated US\$5.7 million to support the humanitarian response to the earthquakes, helping deliver life-saving assistance, protection and access to essential services for affected populations through AICS, WFP and IFRC.
- Caritas Spain announced an increase in its contribution to €1 million to support the earthquake response in Venezuela, including the €300,000 mobilized during the first days of the emergency. This support is complemented by the deployment of representatives from Caritas Spain and other Cáritas network organizations in the country, providing technical and coordination support in WASH, food security, livelihoods, risk management and shelter.
- A new European Union Humanitarian Air Bridge flight landed on 13 July carrying 29 metric tonnes of shelter and water, sanitation and hygiene (WASH) supplies. The cargo included European Union-funded assistance for IOM, Irish-funded support for GOAL Global, and UNICEF supplies.
- The Central Emergency Response Fund (**CERF**) allocated US\$15 million to support a multisectoral response, alongside the activation of the Venezuela Humanitarian Fund (VHF). **Norway** contributed to support the response through CERF.
- **The United States** announced a US\$100 million contribution to the VHF, in addition to a further US\$100 million in bilateral funding for response operations implemented by IOM, WFP, UNICEF, International Medical Corps, Catholic Relief Services, Samaritan's Purse, Proyecto Esperanza and the Red Cross.
- **Germany** and the Republic of **Korea** contributed US\$5 million and US\$1.25 million, respectively, to the VHF to support humanitarian action in the country.
- On 14 July, the **Republic of Korea** announced an additional allocation of **US\$3.5 million** in humanitarian assistance. Of this amount, **US\$3 million** will be channelled through **UNDP** to support debris removal activities, while the remainder will be provided in-kind, specifically through **30 metric tons of temporary shelters (family tents)**. The Republic of Korea had previously allocated **US\$1.25 million** to **WFP** and **US\$2.5 million** to **UNICEF** in support of the humanitarian response in Venezuela.
- **Japan** allocated US\$3.5 million to support the earthquake response. The funding will provide humanitarian assistance in key sectors, including food security, health care, shelter and non-food items, through WFP, the International Federation of Red Cross and Red Crescent Societies (IFRC) and IOM.
- The **European Union** allocated €5 million to support the emergency response, in addition to the €52 million already allocated this year for humanitarian operations in the country.
- **Australia** announced a US\$2 million contribution to support the provision of food, shelter, healthcare and access to safe water through IFRC and WFP.
- **Switzerland** announced a contribution of CHF 2.5 million to support the response.
- **Sweden** allocated SEK 25 million to support the humanitarian response through food assistance, water, temporary shelter, protection and family reunification programmes implemented by WFP, UNHCR and Save the Children.
- **Denmark** announced an additional contribution of DKK 11 million to support the humanitarian response, including DKK 10 million through UNHCR and DKK 1 million through DanChurchAid and the Danish Red Cross.
- The Disasters Emergency Committee (**DEC**) announced an initial allocation of £7.5 million for the earthquake response in Venezuela, including £2 million contributed by the United Kingdom Government through UK Aid Match. The funds will be implemented by DEC member agencies and their local partners to support the humanitarian response.
- As part of the support provided by UNDAC, the team includes a private sector coordination specialist to strengthen business engagement in response and recovery efforts. A private sector contributions tracker for the Venezuela earthquake response is available at <https://ven-eq.connectingbusiness.org>, together with a briefing note for the private sector outlining opportunities for engagement. Focal point: sanchez21@un.org.
- **OCHA** continues to coordinate with donors and partners to ensure rapid, strategic and needs-based allocation of resources.
