

HNPW 2026 REPORT

SHAPING THE HUMANITARIAN RESET:

From Global
Commitments to
Local Action

Acknowledgements

This document was co-authored by Nadine Andrea Jaeggi, Diletta Bianchi and Katya Widyatmotko from the OCHA Response Branch.

A special thanks to Anna Tazita Samuel, Faiza Altamimi, Hashim Amiri, and Jonas Habimana for their open and candid conversation on locally led action during the keynote session, and to Anzhelika Bielova, John Ede, Nimo Hassan and Raquel Weintraub for their reflections at the opening ceremony. We also thank all those who completed the HNPW survey and generously shared their time and insights to help shape this report.

Executive Summary

The 12th iteration of the Humanitarian Networks and Partnerships Weeks (HNPW), co-hosted by OCHA and Switzerland, returned in 2026 with a renewed, shorter format and a strengthened strategic focus, with this year's chosen theme centred on shaping the humanitarian reset and moving from global commitments to local action. The newly introduced [Community Day](#) on Wednesday, 11 March 2026 served as the anchor of the event, bringing together networks and partnerships to deepen collective reflection initiated at last year's HNPW on how the humanitarian system must evolve amid shifting geopolitics and declining global funding, and to identify practical steps to drive the reset forward.

Marking one year since the launch of the humanitarian reset, OCHA convened a [briefing on the humanitarian reset](#) prior to HNPW to update networks and partners on progress against commitments. During the Community Day, Under-Secretary-General for Humanitarian Affairs and Emergency Relief Coordinator, Tom Fletcher led a [keynote dialogue](#) with humanitarian leaders from Yemen, the Democratic Republic of the Congo, Afghanistan, and South Sudan. The discussion offered an honest assessment of achievements to date, the barriers that hinder progress and the commitments needed to accelerate change.

Participants acknowledged early improvements, such as increased allocations of country-based

pooled funding to local and national NGOs, stronger representation in country teams and examples of co-leadership of clusters. However, they stressed that key parts of the system are still falling short in delivering on the humanitarian reset's localization commitments. They called for genuine power sharing and more substantial local representation in global and regional-level decision-making bodies.

Community Day sessions, focused on Transition of Power, Resilience and Sustainability, Streamlined Coordination and Efficiency and Innovative Financing, reaffirmed several core commitments essential to advancing the humanitarian reset and shifting from global commitments to local action. These included: re-directing resources and authority to national responders without unnecessary intermediaries, investing in long-term system strengthening of local institutions rather than short-term parallel mechanisms; improving operational agility by streamlining coordination and reducing bureaucratic barriers as well as diversifying funding flows.

Together, these discussions underscored a shared determination to ensure the humanitarian reset delivers tangible improvements for people living through crisis. There was a clear call for humanitarian actors to maintain momentum and concrete action over the coming year to translate commitments into measurable impact on the ground.

Introduction

The Humanitarian Networks and Partnerships Weeks (HNPW) 2026, co-hosted by OCHA and Switzerland, once again proved to be a key forum for humanitarian practitioners to convene, exchange perspectives, learn from one another, collaborate, innovate, and shape meaningful commitments and forward-looking solutions.

With close to 300 sessions, 55 exhibition stands organized by 78 networks, and 7,800 participants, including 2,000 who joined in person in Geneva, the strong participation underscores not only the relevance of HNPW, but also its growing influence as a global platform shaped by practitioners, for practitioners.

This year, the event adopted a renewed, shorter format and a strengthened strategic focus, guided

by the theme: **Shaping the Humanitarian Reset - Moving from Global Commitments to Local Action.**

Particular emphasis was placed on capturing and synthesizing key takeaways and recommendations from the keynote session, as well as from sessions on selected core topics of the humanitarian reset, namely **Transition of Power, Resilience and Sustainability, Streamlined Coordination and Efficiency, and Innovative Financing**, to generate clear insights and practical guidance for the next phase of the humanitarian reset.

In addition, for the first time, the outputs and outcomes from sessions held during HNPW 2026 were systematically compiled to support follow up on commitments made by networks and partners and to assess progress ahead of next year's HNPW (see Annex 1).

One Year into the Humanitarian Reset

The keynote session examined progress made one year into the humanitarian reset. Dominik Stillhart, Head of Swiss Humanitarian Aid, reiterated that the system must evolve toward a model in which **local and national humanitarian actors lead by default**, with international actors stepping in only where necessary - not the other way around.

Emergency Relief Coordinator Tom Fletcher reflected on the reset's first year and emphasized that the reset is fundamentally about **defending core values and principles, refocusing on lifesaving priorities, shifting power, money, and decision-making authority to local actors, while simplifying and reforming existing processes**.

While acknowledging some encouraging progress, he stressed that change is still moving far too

slowly. He pointed to three core barriers impeding advancement:

Power: Local actors, such as local NGOs, civil society, or national governing bodies doing humanitarian work, still lack meaningful representation in critical decision-making spaces, with decisions often taken first and consultations added afterwards, rather than placing local actors at the center of the process.

Money: Funding continues to be diluted through multiple layers of intermediaries, leaving only a fraction of resources in the hands of local and national organizations delivering assistance on the ground.

Process: Processes remain overly top down, with international actors assessing local partners rather than being held accountable by them.

Tom Fletcher called for a profound mindset shift and urged international actors to stand back where local colleagues are better placed to lead.

“We’ve really got to understand this point about creating space for others to take the lead. That doesn’t just mean telling people that we’re giving them power - it means getting out of the way.”

- Tom Fletcher

He underscored that **mindset**, not technical hurdles, **remains the biggest obstacle** to achieving a truly locally-led system.

What Local Humanitarian Leaders Are Telling Us

Tom Fletcher then engaged in a candid dialogue with humanitarian leaders to explore what the reset looks like in practice. He spoke with Anna Tazita Samuel, Executive Director of Women for Change from South Sudan, Faiza Al Tamimi, Chairwoman of Nahda Makers Organization from Yemen, Hashim Amiri, Executive Director of Afghanistan Institute of Civil Society from Afghanistan, and Jonas Habimana, Executive Director at Biferd NGO from Democratic Republic of Congo. Their interventions were grounded, direct, and uncompromising.

“We should no longer talk about engaging local actors. It should be a humanitarian system where local and international actors are equal family members, not one owning the system and engaging the others.”

- Faiza Al Tamimi

They noted some visible **signs of progress** emerging in their respective country contexts: increased representation in humanitarian country teams; a growing share of pooled funds reaching local actors; instances of national NGOs co-leading clusters and technical working groups, albeit often without the financial resources to sustain these roles; greater involvement of local and national organizations in promoting humanitarian standards; and improved access to global platforms.

“Handing over coordination responsibilities without resources is not localization.”

- Jonas Habimana

However, they also underscored **persistent structural barriers**: fragmented and burdensome compliance systems designed for large international organizations; funding channeled through multiple intermediaries that dilute resources and slow delivery; intermediaries often dictating terms of engagement and project design; international organizations handing over responsibilities under rushed transitions when funding runs out; limited long-term and flexible funding; risks being pushed downward to local organizations; and continued exclusion from key decision-making spaces where national and global strategies are shaped.

Across their contributions, local leaders converged on a shared call for **genuine power sharing, simplified processes, and sustained investment in local systems and existing capacities**, rather than short-term and fragmented support.

“Localization should be measured not by participation, but by real shifts in resources, leadership, and decision-making authority.”

- Hashim Amiri

CICG, Geneva, Switzerland, 11 March 2026. Faiza Al Tamimi, Chairwoman of Nahda Makers Organization and USG Tom Fletcher from the Keynote Session: Shaping the Humanitarian Reset: From Global Commitments to Local Action. Credit: OCHA/Joel Oplencia.

Tom Fletcher closed by acknowledging these challenges and committing to measurable action over the year until the next HNPW, signaling **a shift from rhetoric to accountability**. The session reinforced that the humanitarian reset will only succeed if local leadership is not merely recognized, but structurally embedded across the humanitarian system.

“Let us finally act on what we discuss around tables and let us walk the talk.”

- Anna Tazita Samuel

Local humanitarian leaders called for:

- Concrete action, not more policy commitments
- Shift from participation to true co ownership of the system
- Real representation and leadership in global, regional and country-level decision making
- Inclusion in needs assessment and project design, not just implementation
- Direct donor funding with fair and transparent cost-recovery provisions
- Shared risk frameworks
- Simplified, unified compliance requirements
- Mutual accountability that apply equally across the system

Community Day: What Emerged from the Humanitarian Reset Core Topic Sessions

Transition of Power

Sessions under this topic explored what it takes to make humanitarian assistance genuinely locally led, including the shifts in power, resources, and decision-making needed to empower local actors. Key take-aways include:

Local leadership as the default. Empower local and national actors to set priorities, design programs, and lead coordination efforts in a way that avoids zero sum dynamics. Responses should be locally led and internationally supported.

From participation to real influence and decision-making authority. Local actors must move beyond being merely consulted to directly shaping programme designs, budgets and overall strategic direction.

Funding flows re-directed and fair partnership principles applied. Increase direct financing, including overheads, to local and national NGOs and remove layers of intermediaries. Ensure this shift does not create new power imbalances, particularly between large national NGOs and smaller organizations that may be better placed for specific roles.

Long term organizational strength. Include overhead costs or specific budget lines for organizational development to allow local and national actors to build and strengthen systems and processes, invest in and retain staff, and plan beyond short project cycles.

Risk shared. Share responsibility rather than pushing risk downward. Donors should also avoid creating additional risks through short project cycles and rigid funding requirements.

Illustration by Julia Bakay

Harmonized and simplified compliance systems. Donors must align requirements and ensure proportionate due diligence standards adapted to local realities.

Trust through transparency. Commit to open communication and shared data, and clearly disclose how much funding goes to local actors and under what terms—including overheads and cost recovery—to reduce power imbalances that often come from uncertainty.

Upward flowing feedback channels. Enable local organizations to evaluate international partners, not just the other way around.

Resilience and Sustainability

Sessions under this topic explored how humanitarian action can better support long term recovery and self-sufficiency, moving beyond short-term crisis response and accelerate the transition to locally-led systems, particularly in contexts where strong local capacity already exists. Key take-aways include:

Investment in systems, not just short-term projects. Strengthen local institutions, informal finance systems and markets and public services rather than creating short-term parallel mechanisms, so they can remain functional long after external actors leave.

Government leadership is fundamental for sustainability. Support governments to build policy frameworks that clarify mandates, align actors, and shift from reactive response to anticipatory action and long term solutions.

Strengthened community ownership. Listen to communities to understand real needs, set priorities, monitor progress, and ensure accountability, they know their realities best.

Integrated humanitarian, development, and peace-building approaches. Break down silos so recovery efforts address root causes, not just immediate symptoms.

Illustration by Julia Bakay

Existing local capacity recognized and prioritized. Step back and support what already works instead of creating parallel structures.

Capability before immediate needs. Recognize and build on people's skills and strengths from the start to avoid short-term fixes and enable long-term self sufficiency.

Streamlined Coordination and Efficiency

Sessions under this topic examined what it takes to redesign global and national coordination systems to be more agile, adaptive, and responsive during crises. They also looked at how to strengthen accountability and transparency in decision-making, ensuring clear and meaningful communication channels with local actors. Key take-aways include:

Processes simplified and streamlined. Rethink and simplify partnership, funding, and operational procedures so they match the realities of small, under resourced local actors.

Duplication eliminated and complementarity strengthened. Bring the full range of actors around the table, including governments, humanitarian organizations, development partners, civil society and financial institutions to ensure coordinated action.

Reporting processes harmonized. Align reporting requirements and reduce repetitive processes to free up time and resources for actual response.

Agility built into system architecture. Replace overly procedural and slow systems with flexible, adaptive structures that can quickly respond to urgent and changing crisis realities.

Reduce bureaucracy. Cut unnecessary steps, approvals, and paperwork that delay action and drain capacity.

Illustration by Julia Bakay

Clarify and open communication channels. Establish clear, two way communication with affected communities so they understand decisions and can influence them.

Local leadership in coordination with adequate resources. Ensure that funding includes the necessary means for local organizations to take on and sustain cluster co-chair role.

Innovative Financing

Sessions under this topic focused on how to diversify funding streams and reduce reliance on a limited number of major donors, exploring ways to broaden partnerships, particularly with the private sector, and to expand the use of innovative financing mechanisms that can strengthen and sustain humanitarian action. Key take-aways include:

More resilient and flexible funding model. Shift from project restricted grants to diversified, multi year, core funding to enable long term planning and independence.

Private sector partnerships broadened. Build long term collaborations with businesses that offer capital, technology, expertise, and shared value opportunities, not just CSR grants.

Whole of financing approaches are essential. Combine humanitarian funding with national budget allocations and local financial institutions while maintaining strong local leadership.

Pooled funding increased. Expand shared financing mechanisms, including locally-led or area-based pooled funds, to enable rapid, flexible responses, support shared risk taking, and improve access to resources for local actors. Include dedicated

Illustration by Julia Bakay

funding for tailored organizational capacity strengthening.

Alternative financing mechanisms expanded. Use blended finance, social impact bonds, and digital crowdfunding to unlock new and more flexible financial resources.

What We Learned from the HNPW Survey

CICG, Geneva, Switzerland, 11 March 2026. One more note for the community board at HNPW 2026. Credit: OCHA.

An online survey was conducted with the support of Sphere and Monday.com to gather insights on how organizations have adapted to the humanitarian reset since the last HNPW and where practitioners see the most urgent needs for reform.

The survey gathered 194 results from a diverse group of participants representing over 67 countries. While the geographic representation is broad, respondents were mainly from Europe and notably from several African countries, with fewer responses from the Americas and Asia. Respondents also varied in seniority levels, reflecting perspectives from both emerging and established humanitarian practitioners.

Organizational Adaptations to the Reset

Respondents reported several adaptations to their usual ways of working since the last HNPW and following the launch of the humanitarian reset. The three most frequently mentioned elements were:

- Increased partnership with local actors
- Organizational restructuring
- Internal learning and reflection

With over 75% of respondents indicating increased collaboration with local and national actors, there appears to be a clear and sustained commitment to advancing long-standing localization commitments. Beyond establishing new partnerships, respondents also reported concrete actions such as allocating quota-based representation for local and national actors in key country level decision making fora,

engaging affected communities throughout the entire programme cycle to leverage local knowledge and foster ownership, working through existing local governance structures and community committees rather than establishing parallel structures, and establishing platforms for capacity building, knowledge transfer and resource mobilization to support locally-led action.

Perceived Barriers to Local Leadership

Respondents were also asked to identify the main barriers to local leadership in humanitarian action. Three main obstacles that stood out were:

- Limited funding
- Donor risk aversion and compliance requirements
- Exclusion from coordination mechanisms

Despite widespread organizational commitments to locally led action, over 95% of respondents identified limited funding opportunities as a primary constraint to local leadership, while 70% pointed to restrictive donor requirements that favour traditional top-down partnership models, often channeled through intermediaries. Coordination mechanisms also remain largely dominated by international actors. These approaches limit the development of equitable, trust-based collaborations in which local and national actors can move beyond the role of mere implementers and assume leadership and decision-making responsibilities. These findings highlight a major gap between stated commitments and the enabling conditions and structures needed to translate them into action and call for systemic

change in the way international actors, and donors in particular, share power and resources.

“If communities and local actors are the first to respond and the last to leave, they must also be the first to lead and the first to be funded.”

- Survey respondent

Priority Areas for Change

When asked to identify key actions to improve humanitarian action in future, respondents overwhelmingly prioritized two areas:

- Increase flexible and multi-year funding
- Build local technical, managerial, and institutional capacity

This ranking reflects again a strong demand for structural and financial reforms that would reduce strict earmarking by donors to enable more rapid, efficient, and locally driven humanitarian responses, with almost 90% of respondents asking for greater access to flexible and multi-year funding.

A common thread across the findings is a clear willingness to commit to a shift towards locally led action by organizations that is hindered by the current lack of funding and insufficient flexibility within prevailing funding modalities, which if remained unaddressed severely restrict the scope for meaningful change.

Conclusion and Way Forward

This year's HNPW demonstrated once again that the event is a key forum not only for humanitarian practitioners to exchange perspectives and collaborate, but also to challenge one another to shape impactful commitments. The key-take aways from the four core topics of the humanitarian reset: Transition of Power; Resilience and Sustainability; Streamlined Coordination and Efficiency; and Innovative Financing — point to concrete and interlinked priorities for the coming year. Although the keynote session highlighted visible progress on the humanitarian reset in the past year, it underscored that much work is to be done to shift from rhetoric to accountability and genuinely realize localization.

Looking ahead to the next iteration of the HNPW, the challenge is to ensure that commitments made during the two weeks are translated into action. Tangible outputs and action points coming from the sessions have been recorded and will be used to track progress on its implementation in the year ahead. Accordingly, the next HNPW will be inviting humanitarian leaders and practitioners to use the event as a platform to hold each other into account.

Annex 1: Key Results and Commitments

The list below reflects immediate session outputs as submitted by session organizers and may not be fully exhaustive.

NETWORK/ PARTNER	SESSION	TITLE	DESCRIPTION
Activity Info	Making Shared Information Management Systems Work	Technical Guidelines: Framework for Designing Shared Information Management Systems	A practical framework for Information Management practitioners covering the key components to consider when designing a new shared Information Management System for a collaborative initiative.
Anticipation Hub / Anticipatory Action Taskforce	Ready When It Matters: Getting Prepared for the Final Hurdle of Delivering Anticipatory Actions	Technical Guidelines: Operational Readiness for Effective Anticipatory Action: Lessons from Implementation	A strengthened understanding of the operational conditions required for timely and effective activation of Anticipatory Action.
	Practical Pathways to Locally Led Anticipatory Action	Technical Guidelines: Minimum Viable Package (MVP)	Participants agreed on five non-negotiable dimensions that build the core of the MVP and define minimum standards for what 'locally-led' means and collectively designed the MVP.
CBI and others	Silent Reset, Bold Results: Harnessing Technical Expertise for Children	Outcome Report: Call to Action	Summary Call to Action
CHS Alliance	Driving Collective Culture Shifts in Protection from Sexual Exploitation, Abuse and Harassment (PSEAH)	Outcome Report: Lessons Learned from Real-Life SEAH Scenarios for Strengthened Prevention and Response	Lessons learned from the analysis of three real-life scenarios, where participants identified causes, prevention gaps, and future actions to improve safeguarding in humanitarian response.
Connecting Business Initiative (CBI)	Corporate Philanthropy and Engagement in Humanitarian Action: How Can Businesses Step Up?	Partnership Agreement: OCHA and SANY Foundation	SANY Foundation and UNOCHA signed a MoU, formalizing a cooperation framework covering disaster preparedness, emergency response, and early recovery for the benefit of people in crisis around the world.

NETWORK/ PARTNER	SESSION	TITLE	DESCRIPTION
Connecting Business Initiative (CBI)	Lessons Learned from Private Sector Engagement during Hurricane Melissa	Article: Same room, higher stakes: What HNPW 2026 asked of actors in the humanitarian space	The article summarizes the key outcomes of the discussion and how to achieve scalable partnerships between the humanitarian system and the private sector, grounded in trust, local knowledge, and shared infrastructure.
Global Education Cluster, The Alliance, Save the Children, Plan International, Norwegian Refugee Council, Geneva Global Hub for Education in Emergencies	Children and Young People Tell Us What They Need. Response Plans Reflect Some of What They Said. Funding Reflects None of It	Report: Put Us at the Centre – What Children and Young People in Humanitarian Crises Asked For – and the Decisions that Followed	Save the Children, Plan International and NRC launched this new report analyzing 24 consultations held with children, adolescents and youth in humanitarian setting and calling urgent reforms to centre young people in decision-making, embed accountability across the humanitarian system, and shift from token consultation to genuine partnership.
Global Health Cluster	Accountability to Women and Girls: Upholding Sexual and Reproductive Health Standards in Humanitarian Response	Article: Accountability to Women and Girls: Protecting Sexual and Reproductive Health in Intensifying Humanitarian Crises	A blog publication summarizing the key takeaways from the session, arguing that sexual and reproductive health (SRH) is life-saving, non-negotiable humanitarian aid that must be prioritized through funding, coordination, and local accountability.
Global Hub for Education in Emergencies	Advancing Anticipatory Action and Preparedness for Life-Saving Education Response – Progress and Learning	Event Report: The Growing Importance of Anticipatory Action for Education	The report showcases how the education sector is increasingly embracing anticipatory approaches, and what lessons can be drawn from interventions around the globe.
Global Logistics Cluster	Past Reset to Results – Humanitarian Supply Chains as Strategic Enablers	Strategic Framework: Priority Recommendations for 2026–2027	Participants converged around a set of practical recommendations to guide collective action over the next two years, including strengthening local supply chain resilience by involving governments, local organizations and private sector actors as core partners.

NETWORK/ PARTNER	SESSION	TITLE	DESCRIPTION
Global Protection Cluster/ PALAN (convened by IRC)	Who's in the Driver's Seat? Centering Locally-Led Protection Analysis across Analysis-In- formed Planning, Response and Transition	Outcome Report: Locally-led Protection Analysis	The report presents key findings and recommendations from local organizations involved in a global research initiative on their engagement in and leadership of protection analysis initiatives, as well as recommendations on how to integrate locally led protection analysis into the humanitarian reset.
Global Shelter Cluster/ IOM	Common Pipeline Mechanisms: Enhancing Relief Distribu- tion Efficiency	Technical Guidelines: Summary on Common Pipeline Mechanisms (CPMs)	A technical summary note was shared documenting good practices and operational lessons learned on Common Pipeline Mechanisms (CPMs).
Gray Dot Catalyst	Scaling Health Innovations in Emergencies	Blog: Value Networks	The blog is a reflection of the discussions that took place at the session. The Learning Paper will dive deeper into the framework and concepts introduced with more examples from the CHIC Innovation cohort.
INSARAG	INSARAG Steering Group	Working Group Extension	ISG endorsed the extension of two Working Groups until 2031: Search and Rescue in Flood Response Working Group and National Capacity Building Working Group.
		Strategic Framework: INSARAG Strategy 2026-30	ISG endorsed the INSARAG Strategic Plan for 2026-2030, including a new vision statement, overarching goals and strategic objectives of the network.
		Technical Guidelines: INSARAG Guidelines 2026	ISG endorsed two amendments to the INSARAG Guidelines, which serve as the international standard for how urban search and rescue (USAR) teams and national authorities should coordinate, operate, and manage response efforts during sudden onset disasters.

NETWORK/ PARTNER	SESSION	TITLE	DESCRIPTION
INSARAG	INSARAG Steering Group	Governance Review	ISG endorsed the Governance Review including the thematic areas on decision-making mandate, accountability and compliance, and localization.
Next Humanitarians	Is it worth it? Joining the sector in times of financial turmoil	Community of Practice: Next Humanitarians Connect	A WhatsApp group to share resources, publications, links, insights, events, and more among the next generation of humanitarians.
NORCAP, Joint Initiative for Greening Humanitarian Response, EHAN, FEBA	Reimagining the Joint Initiative for Greener Humanitarian Assistance: The Future is Ours to Build	Outcome Report: Coordination Mechanisms for Greening Humanitarian Response	Re-establish a central space, or interconnected spaces, for environmental-humanitarian collaboration to replace lost platforms such as JEU and EHA Connect.
Peaceland Foundation	Launch of China's Civilian Maritime Medical Rescue Vessel & Innovative Humanitarian Equipment: Advancing Technology-Driven Response	Article: Exploring Innovations in Humanitarian Action with Global Partners	Article to showcase key outcomes of the session and call on more stakeholders to join humanitarian action for a more sustainable future.
	AI for Humanitarianism: Youth-Led Innovation in Crisis Response	Partnership Agreement: GYP AI for Good Youth Alliance	This alliance aims to dismantle technical silos and build a global, cross-disciplinary network. GYP will mobilize resources to support students and young professionals in applying AI to the UN SDGs to promote the responsible and ethical use of AI as a transformative force for social good.
REAP	Earth Intelligence for Humanitarian Action: GEO Solutions for Early Warning, Crisis Response, and Community Resilience	Outcome Report: Earth Intelligence for Humanitarian Action: GEO Solutions for Early Warning, Crisis Response, and Community Resilience	The report summarizes the key discussion points and recommendations and was presented at the First CREWS Operational Coordination meeting to guide the implementation of this new innovation workstream.
SBP/DRRS (Government of Netherlands)	Cholera, Where Water Utilities and Humanitarians (Should) Meet - An Emergency Simulation in Zambia	Article: Strengthening cholera control through simulation-based training with Zambia's water utilities	This press release is tied to the HNPW session and was published around the same date of the session.

NETWORK/ PARTNER	SESSION	TITLE	DESCRIPTION
SBP/DRRS (Government of Netherlands)	Cholera, Where Water Utilities and Humanitarians (Should) Meet - An Emergency Simulation in Zambia	Technical Guidelines: Strengthening cholera control through simulation-based training with Zambia's water utilities	The technical guidelines are a guide on how to replicate the training. They will be released in cooperation with GTFCC and the cluster in the coming months.
SCHR	Designing for Complementarity: Exploring the Shifts Needed to Build a More People-Centred Humanitarian Ecosystem	Advocacy Statement: Complementarity Through a Localisation Lens	An advocacy statement on behalf of the Charter4Change network to position the discussion around complementarity in the context of localisation.
Shelter, Land and Site Coordination Cluster	Extreme Heat and Humanitarian Response: Operational Perspectives and Opportunities	Action Plan: Actions to Address Extreme Heat in Humanitarian Operations	The plan lies out concrete actions to improve risk awareness, access to information and learning as well as practical technical options and approaches.
Standby-Partners (SBP)	SBP Annual Consultations	Strategic Framework: SBP Network 2026-28 Strategy	Launch of the SBP Network Strategy which sets out the collective direction for the network over the period 2026–2028. It reaffirms partners' commitment to efficient, impactful deployments while strengthening agility and strategic positioning.
		Technical Guidelines: Duty of Care Guidance Documents	Validation of three new guidance documents developed by the SBP Network Duty of Care Working Group on fit-check calls, national deployees and handling of major incidents.
		Working Group: SBP Network MEAL Working Group	Validation of the SBP Network MEAL Working Group proposal for the 2026 Joint Monitoring Mission which will assess the contribution of SBP deployments to strengthening inter-agency coordination in selected humanitarian contexts (DRC, OPT and South Sudan).
UNDRR	Leveraging Existing Resources: Scaling Anticipatory Action Through Smarter Finance	Tool: AA Financing	Based on a consolidated mapping of financing approaches for anticipatory action, existing mechanisms for tracking AA financing were identified and key challenges and gaps documented.

NETWORK/ PARTNER	SESSION	TITLE	DESCRIPTION
UNHCR	Beyond the State: Localizing Solutions in Fragile Displacement Contexts	Outcome Report: Studies on IDP Operational Engagement and Best-Practice Assessment on Localization and Involvement of Field Practitioners	Provides guidance and advisory evidence to field practitioners, experts, policy makers, and related stakeholders to support informed decision making, strengthen program implementation, and enhance the overall effectiveness of operational and strategic interventions.
UNICEF- Inclusion AOCC Lead	Inclusive Transition of Power	Outcome Report: Inclusive Transition of Power- Inclusion AOCC Outcomes Report HNPW 2026	Report of the 3 inter-linked Inclusion AOCC Sessions at the HNPW 2026 Community Day
World Vision International	From Hunger to Hope: Advancing School Meals Programming in Fragile and Conflict-Affected Settings	Strategic Framework: School Meals as a Pathway for Peace and Social Cohesion	This framing paper, developed by the World Food Programme (WFP) and the Institute of Development Studies (IDS), outlines the role of school meals programmes in fragile and conflict-affected settings, while investigating their contribution to peace and social cohesion.

Annex 2: Forward-Looking Commitments

The list below reflects commitments to be implemented over the next year as submitted by session organizers and may not be fully exhaustive.

NETWORK/PARTNER	SESSION	OUTCOME/COMMITMENT	RESPONSIBLE FOR FOLLOW-UP
AnsuR Technologies with support from INSARAG and SERAG	Ultra-Low-Bandwidth Visual Communication for Disaster Response: From Portable Satellite Terminals to Satellite-Enabled Smartphones	Increase awareness of ultra-low bandwidth visual communication capabilities including through pilot deployments and field testing with humanitarian organizations and collaboration with satellite connectivity providers.	AnsuR Technologies
Avoidable Deaths Network (ADN)	Campaigning to Reduce Avoidable Deaths in a Climate-Challenged World	Expand the global campaign IAD4AD participation and visibility across countries by improving communication, awareness and outreach strategies.	ADN
	Debate Whether the Climate Crisis is a Communication Crisis	Strengthen collaboration with journalists and media professionals and develop localized and culturally relevant communication strategies and action-oriented campaigns.	ADN
CHS Alliance	Driving Collective Culture Shifts in Protection from Sexual Exploitation, Abuse and Harassment (PSEAH)		CHS Alliance
	The Shared Responsibility: Driving Collective Culture Shifts in Protection from Sexual Exploitation, Abuse and Harassment (PSEAH)	Build capacity for timely, victim/survivor-centred investigation.	CHS Alliance
	Mandating Accountability for a Values-Based Sector - Contributing to the 2026 Humanitarian Accountability Report (HAR)	Finalize and publish the 2026 Humanitarian Accountability Report to which the session has directly contributed.	CHS Alliance

NETWORK/PARTNER	SESSION	OUTCOME/COMMITMENT	RESPONSIBLE FOR FOLLOW-UP
Esri	Geospatial Infrastructure as a Catalyst for National and Local Ownership: Lessons from Jamaica	Identify analogues in other countries or regions where similar nationally-led infrastructure could be strengthened or advocated for.	Esri
Global Protection Cluster (GPC)	Who's in the Driver's Seat? Centering Locally-Led Protection Analysis across Analysis-Informed Planning, Response and Transition	Finalize the research paper on examining what practices promote meaningful inclusion and leadership of local and national organizations in interagency protection analysis processes and produce a learning brief.	GPC
Global Protection Cluster and PALAN (convened by IRC)	Who's in the Driver's Seat? Centering Locally-Led Protection Analysis across Analysis-Informed Planning, Response and Transition	Finalize the research and production of a learning brief	GPC and IRC
Global SLSC Cluster (Shelter, CCCM, HLP)	Automating Area-Based Humanitarian Planning: Demonstrating the LOCALISE-Google Partnership	Further advance the pilot to demonstrate its value and scale up the approach to reach more country operations and partners.	Global SLSC Cluster
Global Youth Philanthropy (GYP)	Youth Storytelling for Humanitarian Impact: Journalism, Film, and Digital Media	Publish 10 youth-produced humanitarian stories on GYP platforms with the first series published by August 2026.	GYP
	Youth Storytelling for Humanitarian Impact: Journalism, Film, and Digital Media	Create a structured mentorship cohort pairing 20 youth participants with professional journalists or media mentors for a 6 weeks engagement.	GYP
	Youth Storytelling for Humanitarian Impact: Journalism, Film, and Digital Media	Produce a digital toolkit outlining best practices for ethical, community-centered humanitarian storytelling by July 2026.	GYP
H2H	GANNET Crisis Response: AI-Powered Quantitative Analysis using HAPI data	Interested organizations to begin integrating GANNET into their existing data ecosystems.	H2H
Humanitarian UN-CM Coord	Security, Humanitarian Access and Protection Engagement	Strengthen multisectoral coordination and create harmonized joint protection data systems.	Humanitarian UN-CM Coord

NETWORK/PARTNER	SESSION	OUTCOME/COMMITMENT	RESPONSIBLE FOR FOLLOW-UP
Humanitarian UN-CM Coord	Security, Humanitarian Access and Protection Engagement	Develop dedicated civilian protection mechanisms outside of peace mission structures and promote principled engagement with de facto authorities.	Humanitarian UN-CM Coord
Islamic Relief Worldwide	TAKAAYA: How community kitchens offer a local lifeline to Sudan's hunger crisis	Map and formally recognize Takaaya, traditional Sudanese kitchens, for access to support, including legal protection, through existing community associations.	Islamic Relief Worldwide
LM International (Lakärmissionen) and Climate Charter Secretariat	Climate Crisis: Shared Humanitarian Risk and Locally-Led Adaptation	Support organizations, particularly Climate Charter signatories, to translate the charter into measurable action plans.	Climate Charter Secretariat
Next Humanitarians	Is it worth it? Joining the sector in times of financial turmoil	Host bi-monthly virtual calls for information sharing and networking as well as regular seminars.	Next Humanitarians
NORCAP, Joint Initiative for Greening Humanitarian Response, FEBA	Reimagining the Joint Initiative for Greener Humanitarian Assistance: The Future is Ours to Build	Re-establish a central space for environmental-humanitarian collaboration to replace lost platforms such as JEU and EHA Connect an to build a unified digital repository for tools and guidance on greening humanitarian response.	The Joint Initiative for Greening Humanitarian Response
OCHA Regional Office for West and Central Africa	Flood Impact Monitoring: A West and Central Africa Case Study	Expand Climap platform and collaborations with ACMAD and other interested organizations.	
Peaceland Foundation	Launch of China's Civilian Maritime Medical Rescue Vessel & Innovative Humanitarian Equipment: Advancing Technology-Driven Response	Mobilize Chinese private sector to engage in humanitarian action in Southeast Asia	Peaceland Foundation
