

MONTHLY MONITORING OF FORCED RETURNS TO HAITI – JUNE 2026

INTRODUCTION:

Under the Migrant Protection Working Group, the National Office for Migration (ONM), the International Organization for Migration (IOM), and the Support Group for Repatriates and Refugees (GARR) gather data on the volume of forced return flows at Haiti's entry points. This information is used to guide appropriate assistance mechanisms for individuals who have been forcibly returned. The collected data includes the number of forcibly returned individuals (through systematic counting), the dates of their returns, and the countries from which they departed. **This report presents an overview of forced return flows observed in June 2026, during which 26,568 people were forcibly returned to Haiti, a 3 per cent increase compared to May 2026, making June the month with the highest number of forced returns since the start of 2026. Compared to June 2025, the number of forced returns during this month rose by 14 per cent. Furthermore, over the first six months of 2026, the number of forcibly returned individuals amounts to 141,720, an 11 per cent increase compared to the same period in 2025, signaling an upward trend in forced returns in 2026 compared to previous years. The border crossings of Ouanaminthe and Malpasse saw the most significant increases between the first halves of 2025 and 2026, with rises of 58 and 165 percent, respectively. Explore the complete dataset collected since 2021 via the [interactive dashboard](#).**

METHODOLOGY:

This data collection is part of the Flow Monitoring component of the Displacement Tracking Matrix (DTM). The objective of Flow Monitoring is to gather information on the volume and characteristics of migrants observed at Flow Monitoring Points (FMPs). These points are selected in consultation with local authorities and partners and based on the contextual analysis carried out by IOM teams. With regard to forced returns to Haiti, these are the arrival points for forcibly returned persons: the main arrival points are the airport and the port of Cap Haïtien, the four official border posts between Haiti and the Dominican Republic (Belladère, Ouanaminthe, Anse-à-Pitres and Malpasse), as well as, occasionally, the port of Les Cayes and the airport of Port-au-Prince.

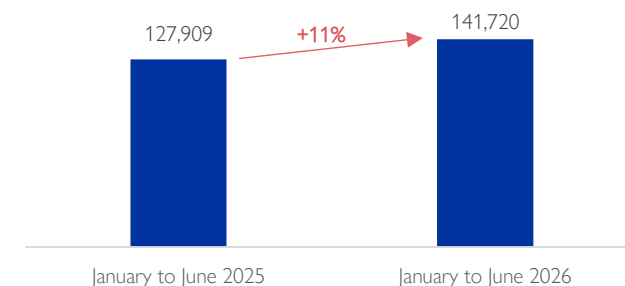

At each of these points, two main data collection methods are deployed: Flow Monitoring Registry (FMR) and individual surveys (Flow Monitoring Survey – FMS). The FMR produces data on the scale of movements, including the number of persons forcibly returned, dates of return, countries of departure, and points of arrival in Haiti. The FMS, for its part, collects more detailed information on the individuals concerned, through interviews conducted with a sample, in order to better understand their profiles, migration history and intentions, and to inform response accordingly. **This report is based on FMR data collected at arrival points between 1 and 30 June 2026.**

Limitations: the data presented pertains to forced return flows, and does not constitute individual monitoring of forcibly returned persons. Thus, the same person who experiences multiple forced returns is counted with each new episode of forced return. FMS interviews, conducted with a sample of over 43,000 forcibly returned persons between 2023 and 2025, showed that 53 per cent of them had already experienced multiple forced returns (see [the interactive dashboard on the profiles of forcibly returned persons](#)).

KEY FIGURES:

Figure 1. Number of forcibly returned persons during the first 6 months of 2026 vs 2025

COMPARISONS BETWEEN 2025 AND 2026

Table 1. Number of forcibly returned individuals per country of departure during the first 6 months of 2026 vs 2025

Country of departure	Jan - Jun 2025	Jan - Jun 2026	% of change
Dominican Republic	125,794	140,018	+11%
USA	455	756	+66%
Bahamas	174	532	+206%
Turks and Caicos	1,432	340	-76%
Jamaica	52	74	+42%
Mexico	2	0	-100%
Total	127,909	141,720	+11%

COUNTRY OF DEPARTURE

Figure 3. Countries of departure in June 2026 (# and % of forcibly returned individuals)

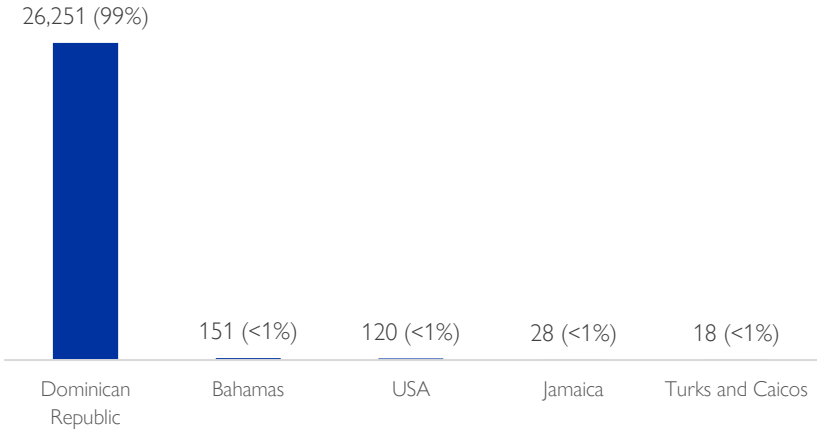

Table 2. Number of forcibly returned individuals per arrival point during the first 6 months of 2026 vs 2025

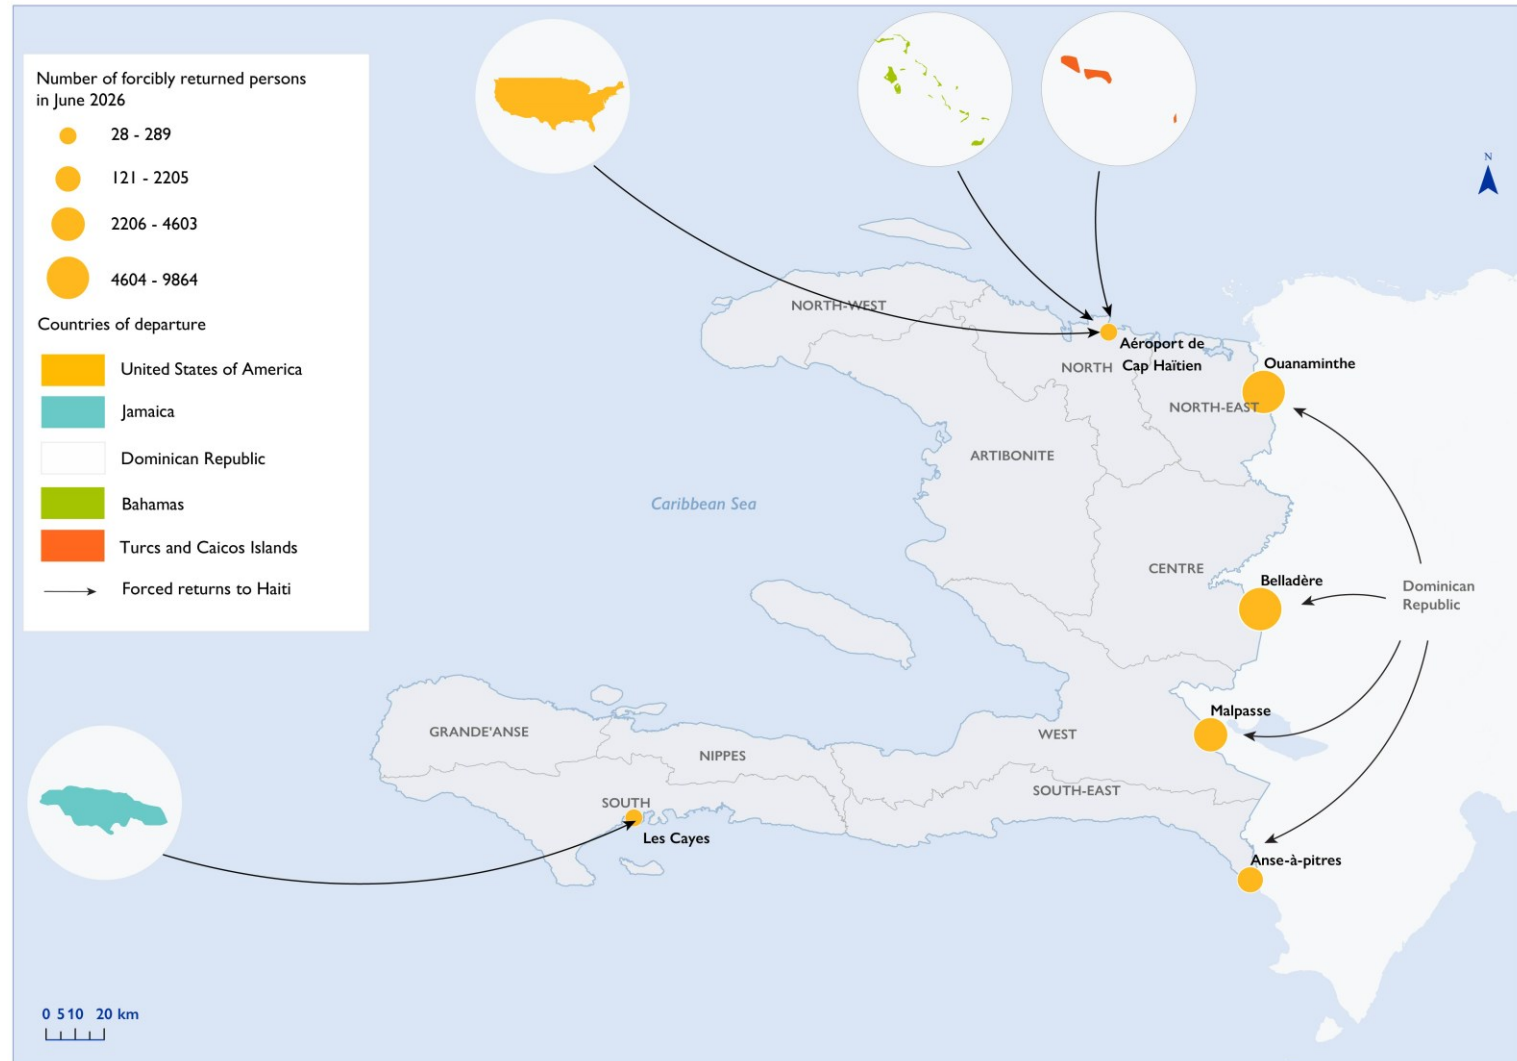

Arrival points	Jan - Jun 2025	Jan - Jun 2026	% of change
Belladère	70,815	53,634	-24%
Ouanaminthe	32,728	51,788	+58%
Malpasse	8,169	21,686	+165%
Anse-à-Pitres	14,082	12,910	-8%
Airport of Cap Haïtien	1,814	1,631	-10%
Port of Cayes	50	71	+42%
Port of Cap Haïtien	231	0	-100%
Port-au-Prince	20	0	-100%
Total	127,909	141,720	+11%
