

Highlights

- Following the 24 June earthquakes of magnitude 7.2 and 7.5 (18:00 local time), **authorities report more than 1,200 aftershocks.**
- Official toll: **4,561 people dead and 16,740 injured.**
- A total of **6,462 people have been rescued.**
- **An additional appeal for US\$298 million was launched to scale up the earthquake response and address the multisectoral needs of 1.3 million people over the next six months.**
- The United Nations system and its partner organizations, in coordination with the Government, are responding with multisectoral actions and will continue to scale up assistance to affected people.

Situation overview

Venezuela is facing a national emergency following two consecutive high-magnitude earthquakes (7.2 and 7.5) that struck on 24 June (18:00 local time) in the north-central region, with the epicentre located along the San Felipe–Yumare–Montalbán axis (Yaracuy/Carabobo). **Authorities report 1,254 aftershocks.**

Nineteen days since the earthquakes, authorities report a toll of **4,561 people dead, 16,740 injured and 6,462 rescued since the onset of the emergency.** Authorities also indicated that **17,907 people remain without housing.**

The Government response remains focused on search operations, the management of transitional camps and assistance to affected populations. The United Nations and its partner organizations, in coordination with the authorities, continue implementing multisectoral response activities and scaling up assistance. United Nations Under-Secretary-General for Humanitarian Affairs and Emergency Relief Coordinator Tom Fletcher **announced a US\$298 million addendum to the Humanitarian Response Plan aimed at addressing the multisectoral needs of 1.3 million people over the next six months.** This is in addition to the 5.5 million people already targeted under the 2026 Humanitarian Response Plan, which requires US\$632 million in funding.

Impact on infrastructure

- Authorities report at least **856 affected buildings, including 190 that have collapsed.**
- As part of recovery and reconstruction planning, authorities have identified 40 sites in La Guaira State, covering approximately 584,000 square metres, for the development of housing projects intended for affected populations.

- An initial assessment by the United Nations Office for Disaster Risk Reduction (UNDRR) indicates that direct damage to housing and infrastructure amounts to approximately US\$37 billion. Most of the damage, estimated at around US\$24 billion, is concentrated in housing, businesses, schools, hospitals, and public facilities. Meanwhile, preliminary estimates by UNDP indicate direct physical damage of US\$6.7 billion, equivalent to 6 per cent of GDP.

National response

- The Government response remains focused on search and rescue operations, as well as assistance to affected people.
- According to authorities, the response continues with **107 transitional camps supporting affected populations**, with a capacity of **25,064 people and a current occupancy of 20,231 people**. As of 13 July, 40 camps are located in Caracas, 29 in Miranda, 28 in La Guaira, and 10 in Aragua.
- Authorities are advancing a unified registration process for affected families in transitional camps through the collection of biometric and contact information to support assistance management, social support programmes and housing solutions.
- The Government of Venezuela announced the creation of an initial reconstruction fund equivalent to US\$200 million.
- A psychosocial support hotline remains available for affected people: 0800-AYUDA-01.
- A digital [form](#) has been launched by the National Council for Persons with Disabilities (CONAPDIS) to support a timely and inclusive response in affected areas.
- Mechanisms have been established to locate missing persons (www.localizapacientes.com) and to report affected individuals (0-800-RESCATE).
- School activities remain suspended in affected municipalities across the states of Aragua (Santiago Mariño, Girardot, Ocumare de la Costa de Oro and Tovar); Carabobo (Juan José Mora, Puerto Cabello, Naguanagua and Valencia); Falcón (José Laurencio Silva); La Guaira (Vargas); the Capital District (Libertador); and Miranda (Chacao, Baruta, El Hatillo, Sucre, Plaza, Zamora, Acevedo, Brión, Buroz, Páez, Andrés Bello and Pedro Gual).

Situation by state

Capital District (Caracas) and Miranda

- First-line responders working in transitional camps participated on 13 July in a Mental Health and Psychosocial Support (MHPSS) training coordinated by the MHPSS, Child Protection and Gender-Based Violence (GBV) Areas of Responsibility, with support from the Ministry of Health, Cecodap and Cedesex.

Response actions: Organizations such as Tinta Violeta, FUNDANA and World Vision are providing protection support to affected families, particularly through psychosocial assistance.

La Guaira

- Authorities and humanitarian organizations continue strengthening the response in La Guaira's transitional camps through the expansion of multisectoral services, improvements in accommodation conditions and coordinated assistance management. During the reporting period, progress was made in the distribution of essential items, food assistance, protection activities, health and psychosocial support interventions, as well as actions to improve access to safe water, sanitation, connectivity and community infrastructure.

Carabobo and Yaracuy (epicentral zone)

- In Carabobo, the most significant impacts continue to be concentrated in Juan José Mora municipality (Morón parish). In Yaracuy, particularly in Veroes municipality and other localities near the epicentral area, homes have been reported as destroyed or at high risk. Recent assessments have identified priority needs in protection, mental health and psychosocial support, health, shelter, water, sanitation and hygiene (WASH), and food security.

Response actions: Five organizations (Venezuelan Red Cross, CESAP, Tierra Viva, Cáritas Morón and Empodérame) are providing response in health, food, water and the distribution of humanitarian assistance.

Falcón (Tucacas – Silva municipality)

- In Boca de Aroa parish, soil liquefaction caused ground settlement and slab displacement affecting 87 houses, compromising the habitability of homes for 252 people. Civil Protection authorities and structural engineers continue conducting technical assessments. Authorities also continue monitoring the overflow of the Aroa River and Los Ingleses stream within a multi-hazard context involving both earthquake and flood risks.
- A technical inspection conducted on 11 July by the Presidential Commission for Habitability Assessment determined that the Boca de Yaracuy Bridge is the transport infrastructure most severely affected by the earthquakes in the area. Temporary diversion measures are being prepared while reconstruction planning is underway. The La Pava, El Paují and Punta Brava bridges sustained minor damage and remain subject to traffic safety measures, speed restrictions and repair works to maintain connectivity between Falcón and Carabobo states.

Response actions: Civil Protection requested support to provide Psychological First Aid (PFA) training to approximately 300 Civil Protection, Fire Department and VEN 911 personnel, in coordination with organizations participating in the Local Coordination Forum. Protection Cluster capacity-building activities continue, alongside WASH and psychosocial support interventions in Boca de Aroa and Palmasola implemented by Action Against Hunger (ACF), Azul Positivo, IOM, Centroccidente, ODISEF and AVSI.

Other states

- **Anzoátegui:** Civil society organizations and humanitarian actors strengthened coordination for the response to affected populations, agreeing on a matrix of responsibilities. Eleven Civil Protection officers were deployed to humanitarian brigades in La Guaira, and 72 pre-hospital emergency students received training on seismic risk management.
- **Apure:** More than 250 people have been displaced as a result of the earthquakes. The Local Coordination Forum (LCF) continues to monitor household vulnerabilities and provide multisectoral assistance, including psychological first aid.
- **Bolívar:** Authorities reported assistance to 41 displaced families (127 people, including 60 adults, 10 older people, 42 children and 15 adolescents), primarily hosted by relatives in the municipalities of Caroní (27 families), Angostura del Orinoco (13) and Cedeño (1). The VEN 911 facility was activated as a temporary shelter with capacity for 120 people, and the state government has dispatched seven humanitarian aid shipments. Coordination with Tinta Violeta is planned to support at least 10 vulnerable families.
- **Delta Amacuro:** Humanitarian actors distributed 20 food kits and 20 hygiene kits to 20 families, as well as approximately 30 kits for children, with support from World Vision International, Médecins Sans Frontières and the Lutheran World Federation. Assessment activities were conducted under the coordination of the health authority, Kape-Kape and Tinta Violeta. An inter-institutional coordination platform was also established, bringing together regional authorities, the health sector and OCHA.
- **Monagas:** The Municipality of Maturín provided support to families from La Guaira hosted by relatives, including a group of 12 people displaced from Ciudad Caribe who are expecting the arrival of four additional family members. Assistance included household items, medicines and supplies to improve hosting arrangements, including mattresses, fans and construction materials.
- **Táchira:** IOM and ODISEF assisted 11 people on the move at the San Cristóbal bus terminal (five women, three men and three children), providing psychoeducational sessions, legal counselling, health services, psychological first aid and hygiene kits. An older person and a lactating woman were prioritized for assistance.
- **Sucre:** A technical team of engineers was deployed to support the assessment, inspection and monitoring of earthquake-affected infrastructure in La Guaira and Caracas, contributing to damage analysis and recovery planning efforts.

- **Zulia:** Assistance to displaced populations continues at the Maracaibo passenger terminal and in receiving municipalities. The response is being implemented by the Citizen Assistance Office (Gerencia de Atención al Ciudadano) and ASONACOP, in coordination with the Red Cross, HIAS, CESVI, ASOREZ and Caritas, as well as Child Protection and Rights Councils.
- Nueva Esparta, Trujillo and Lara reported that coordination, relief collection and monitoring activities remain ongoing, while Local Coordination Forums continue to monitor assistance delivery and protection risks.

Humanitarian coordination

- OCHA, together with the Humanitarian Coordinator and in coordination with national authorities, continues to coordinate the humanitarian response with the United Nations and partner organizations, prioritizing actions in health, shelter, food security, WASH, logistics and protection.
- UNDAC and OCHA continued supporting Civil Protection in strengthening emergency coordination and information management capacities, including technical exchanges on USAR coordination mechanisms and operational tracking tools.
- OCHA continued strengthening coordination with the private sector to support response and early recovery efforts, promoting engagement with specialized actors in areas such as logistics, debris management, infrastructure rehabilitation and reconstruction planning through existing coordination mechanisms between the United Nations and the private sector.
- Venezuelan authorities requested the activation of the Post-Disaster Needs Assessment (PDNA) within the framework of the United Nations system and with the support of UNDP. In line with the internationally recognized PDNA methodology, the corresponding coordination efforts with relevant counterparts will be advanced.
- Authorities informed the activation of a special mechanism to expedite the processing of a “Work Visa for Special Situations” through the Ministry of Foreign Affairs. The procedure will be carried out online under the coordination of the Office of the Vice Minister for Multilateral Affairs and the Consular Affairs Office. It is intended for foreign personnel of international organizations, as well as United Nations staff, deploying to Venezuela in support of the response to the earthquake emergency.

Initial humanitarian response

Food Security

- Since the start of the response, **WFP and its partners have reached over 64,000 people with critical food assistance** across La Guaira. On 13 July, WFP distributed 390 family food baskets in the Urimare communities of Playa Grande, reaching 1,160 people, and an additional 35 family food baskets to support meal preparation in temporary shelters located in Carayaca and Catia La Mar, benefiting 140 people. The baskets contain essential dry food commodities, including maize meal, rice, pasta, lentils, beans, vegetable oil, and salt, providing approximately 75 percent of household food requirements for 30 days.
- In parallel, hot meal distributions continued across temporary shelters in La Guaira, with 7,233 meals served, including 1,364 meals in the Playa Grande community, 2,883 meals at the César Nieves Baseball Stadium, and 2,986 meals at the José María Vargas Sports Stadium, ensuring continued access to food for displaced and affected families. In parallel, assessment teams continue to evaluate market conditions and how to tailor support to the different realities on the ground — including beyond La Guaira — as WFP moves toward modalities that allow families to choose how to best meet their needs.
- During the initial phase of the response, Caritas Venezuela distributed 4,481 food assistance kits, reaching an estimated 72,000 people.

Health

- As of 12 July, 22 international Emergency Medical Teams (EMTs) had been deployed, were mobilizing or were demobilizing in earthquake-affected areas, supporting the health response

through emergency medical care, field hospitals, mobile health services and specialized assistance, and complementing national capacities.

- UNICEF provided primary health-care services to 76 people at the José María Vargas Sports Complex and César Nieves Stadium camps and administered a total of 183 vaccine doses to children and adults across the three transitional camps in La Guaira, including yellow fever and tetanus toxoid vaccines.
- According to Caritas' 13 July report, Caritas Venezuela distributed 73,356 medical supplies and medicines, reaching 17,924 people.
- International Medical Corps (IMC) continues to deploy three Mobile Medical Units (MMUs) in La Guaira state, providing health services in Catia La Mar, Playa Verde, Playa Grande, Puerto Viejo, Las Salinas, La Lucha, Punta de Mulatos and other prioritized locations. The teams comprise general practitioners, nurses, pediatricians, an obstetrics and gynecology (OB/GYN) specialist, support staff, and mental health and psychosocial support (MHPSS) personnel. Between 1 and 8 July 2026, the mobile medical units conducted a total of 944 consultations in earthquake-affected communities in La Guaira. Non-communicable diseases (NCDs) accounted for the largest proportion of consultations (44.3 per cent), followed by communicable diseases (36.3 per cent). Mental health and psychosocial support consultations represented 8.1 per cent of all consultations, while sexual and reproductive health services accounted for 7.0 per cent and trauma/injury-related consultations for 4.3 per cent. In addition, IMC continues to support access to safe water through water trucking activities and has initiated the deployment of a Type 1 Emergency Medical Team (EMT) in Catia La Mar to further strengthen health response capacity.
- On 10 July 2026, Project Hope continued providing health services through health facilities and community spaces in La Guaira, Miranda and the Capital District, delivering 184 medical consultations, 172 treatment courses and seven Pap smear (PAP) tests. In La Guaira, activities focused on the Catia La Mar Baseball Field and Caraballeda, where 81 medical consultations were provided, 172 treatments were distributed and seven PAP tests were conducted, contributing to timely access to primary health care and preventive services. In addition, the organization provided medical consultations in health facilities in the municipalities of Chacao and Libertador, including facilities within the public health network, supporting continuity of care for affected populations.
- Japan will deploy a second contingent of the Japan Disaster Relief (JDR) Medical Team to the affected area, comprising personnel from the Ministry of Foreign Affairs and the Japan International Cooperation Agency (JICA), as well as registered doctors, nurses and other health professionals.

Logistics and Telecommunications

- Through the Logistics Working Group (LWG), WFP is expanding the no-cost logistics services available to humanitarian organizations. In response to requests from partners interested in shipping cargo by sea to Puerto Cabello, support will also be provided for onward transportation from the port to La Guaira.
- A PAHO/WHO flight carrying 26 metric tonnes of health supplies to support the emergency response landed at Simón Bolívar International Airport in Maiquetía.
- The Telecommunications sector advanced the installation of a community internet system (implemented by Emergency.lu) at César Nieves Stadium, with capacity to serve up to 1,000 users and coverage of up to 300 metres.

Nutrition

- UNICEF conducted nutrition activities at the Playa Grande transitional camp, including nutritional screening, infant and young child feeding counselling in emergencies, and micronutrient distribution, prioritizing young children, pregnant women and breastfeeding mothers.

Protection (including Children and Gender-Based Violence)

- UNHCR continued providing legal counselling, psychosocial support, documentation assistance and referrals to specialized services in transitional camps in La Guaira. On 13 July, 119 people, including

children and adolescents, participated in protection activities, legal assistance, case management, psychosocial support, counselling and referral services at the Playa Grande, César Nieves Stadium and José María Vargas Sports Complex transitional camps.

- UNFPA continued supporting the protection response in the José María Vargas, César Nieves and Playa Grande transitional camps through gender-based violence (GBV) awareness-raising activities, reaching 142 people during the reporting period, primarily women, including adolescent girls, pregnant women and breastfeeding women. Dignity kits were also distributed at the César Nieves camp.
- In addition, UNFPA provided specialized protection support across the three camps through 13 psychosocial support interventions, including psychological first aid (PFA), and followed up on one GBV case under case management.
- IOM continued strengthening the management of the José María Vargas temporary camp, providing assistance and protection services to 369 families and coordinating, together with UNHCR and the state authorities, the relocation of five family groups to alternative accommodation sites in Caracas. Planning also advanced for the installation of large-capacity tents at Campo de Golf (Tanaguarena) to expand shelter capacity and service delivery.
- At the César Nieves temporary camp, IOM-led protection screening resulted in 20 referrals to general health services and three referrals to Mental Health and Psychosocial Support (MHPSS) services. In addition, three referrals were made to the Ombudsperson's Office. At the Playa Grande temporary camp, IOM also facilitated seven referrals to health services and two referrals to psychosocial services. Additionally, a Protection from Sexual Exploitation and Abuse (PSEA) session was delivered to police officers.
- UNICEF and its partners provided psychosocial support to 129 children and adolescents and 47 caregivers across the José María Vargas Sports Complex, César Nieves Stadium and Playa Grande temporary camps through activities aimed at strengthening emotional expression, social cohesion, protection, positive parenting, prevention of violence and child sexual abuse, early childhood care and life skills development.

Shelter and Non-Food Items

- At the Campo de Golf (Tanaguarena) transitional camp, Fundación Vivienda Popular, with support from IOM, distributed 120 non-food item (NFI) kits, including tarpaulins, water storage containers, solar lamps, mosquito nets and hygiene kits, to strengthen shelter conditions for affected families.
- At the Mare Abajo temporary camp, UNHCR supported the installation of 30 solar lamps in communal and priority areas of the site to mitigate protection risks and improve safety conditions.

Water, Sanitation and Hygiene (WASH)

- UNICEF and its partners maintained WASH interventions across the José María Vargas Sports Complex, César Nieves Stadium and Playa Grande transitional camps, including the distribution of 80,000 litres of safe drinking water, monitoring of water and sanitation services, hygiene promotion activities reaching 130 people, provision of sanitation supplies, delivery of four shower units (including two adapted for persons with reduced mobility), and solid waste management and sanitation facility maintenance activities.
- At the Campo de Golf (Tanaguarena) transitional camps, IOM coordinated assessments with Action Against Hunger (ACF), Solidarités International and other partners to strengthen water, sanitation and hygiene services, including needs related to toilets, showers, handwashing facilities, water storage and water treatment.
- According to Caritas data as of 13 July, more than 120,000 litres of safe drinking water had been distributed to earthquake-affected communities.

Humanitarian financing and contributions

- The United Nations humanitarian chief, Tom Fletcher, announced an **additional appeal under the Humanitarian Response Plan for Venezuela**. The appeal outlines the multisectoral needs of 1.3 million people over the next six months. To reach those in need, US\$298 million is required, in addition to the US\$632 million requested at the beginning of the year.

- **IOM** launched a US\$98 million appeal to assist 850,000 people and support 140 entities over the next six months. **PAHO/WHO** launched an emergency appeal for nearly US\$24 million to support health response and early recovery activities over the next six months and released US\$1.5 million from the Contingency Fund for Emergencies. **WFP** launched an initial appeal for US\$50 million to scale up food assistance and support emergency logistics and communications activities. **UNHCR** requires US\$14.8 million to support up to 30,000 affected people over the next six months.
- The Government of **Italy** allocated US\$5.7 million to support the humanitarian response to the earthquakes, helping deliver life-saving assistance, protection and access to essential services for affected populations through AICS, WFP and IFRC.
- Caritas Spain announced an increase in its contribution to €1 million to support the earthquake response in Venezuela, including the €300,000 mobilized during the first days of the emergency. This support is complemented by the deployment of representatives from Caritas Spain and other Caritas network organizations in the country, providing technical and coordination support in WASH, food security, livelihoods, risk management and shelter.
- A new European Union Humanitarian Air Bridge flight landed on 13 July carrying 29 metric tonnes of shelter and water, sanitation and hygiene (WASH) supplies. The cargo included European Union-funded assistance for IOM, Irish-funded support for GOAL Global, and UNICEF supplies.
- On 12 July, a shipment from Germany carrying 9.6 metric tonnes of medical supplies, hygiene kits and household items was received. In addition, a shipment carrying 33.9 metric tonnes of humanitarian assistance arrived from Türkiye.
- The Central Emergency Response Fund (**CERF**) allocated US\$15 million to support a multisectoral response, alongside the activation of the Venezuela Humanitarian Fund (VHF). **Norway** contributed to support the response through CERF.
- **The United States** announced a US\$100 million contribution to the VHF, in addition to a further US\$100 million in bilateral funding for response operations implemented by IOM, WFP, UNICEF, International Medical Corps, Catholic Relief Services, Samaritan's Purse, Proyecto Esperanza and the Red Cross.
- **Germany** and the Republic of **Korea** contributed US\$5 million and US\$1.25 million, respectively, to the VHF to support humanitarian action in the country. Other Member States and donors have expressed their intention to support the response through the Fund.
- The Republic of **Korea** has also provided US\$1.25 million to WFP and US\$2.5 million to UNICEF to support the humanitarian response in Venezuela.
- **Japan** allocated US\$3.5 million to support the earthquake response. The funding will provide humanitarian assistance in key sectors, including food security, health care, shelter and non-food items, through WFP, the International Federation of Red Cross and Red Crescent Societies (IFRC) and IOM.
- The Royal **Netherlands** Navy delivered an additional shipment of humanitarian assistance and emergency relief supplies to La Guaira as part of a sustained support mechanism from Curaçao that has already facilitated five consecutive missions. A new vessel will be deployed to ensure the continuity of these operations and support the delivery of assistance to affected areas.
- The **European Union** allocated €5 million to support the emergency response, in addition to the €52 million already allocated this year for humanitarian operations in the country.
- **Australia** announced a US\$2 million contribution to support the provision of food, shelter, healthcare and access to safe water through IFRC and WFP.
- **Switzerland** announced a contribution of CHF 2.5 million to support the response.
- **Sweden** allocated SEK 25 million to support the humanitarian response through food assistance, water, temporary shelter, protection and family reunification programmes implemented by WFP, UNHCR and Save the Children.
- **Denmark** announced an additional contribution of DKK 11 million to support the humanitarian response, including DKK 10 million through UNHCR and DKK 1 million through DanChurchAid and the Danish Red Cross.
- The Disasters Emergency Committee (**DEC**) announced an initial allocation of £7.5 million for the earthquake response in Venezuela, including £2 million contributed by the United Kingdom Government through UK Aid Match. The funds will be implemented by DEC member agencies and their local partners to support the humanitarian response.

- As part of the support provided by UNDAC, the team includes a private sector coordination specialist to strengthen business engagement in response and recovery efforts. A private sector contributions tracker for the Venezuela earthquake response is available at <https://ven-eq.connectingbusiness.org>, together with a briefing note for the private sector outlining opportunities for engagement. Focal point: sanchez21@un.org.
- **OCHA** continues to coordinate with donors and partners to ensure rapid, strategic and needs-based allocation of resources.
