Armenia

COUNTRY BRIEF

JUNE 2026

USD 3.4 M required in the next six months
(June – November 2026)

KEY HIGHLIGHTS

- Armenia hosted a high-level event on “Sustainable School Meal Programmes in Global and Regional Contexts,” bringing together government delegations, international partners, and experts to exchange experiences through workshops, field visits, and peer learning.
- Armenia’s food security is steadily improving, according to the successful completion of the 2026 Food Security and Vulnerability Assessment. dData shows a positive trend, with food insecurity dropping from 20 percent to 18 percent. Additionally, the proportion of marginally food-secure households declined from 54 percent to 49 percent, signaling greater economic resilience and stability for families across the country.
- Amid heightened regional escalation centred on Iran, the situation along Armenia’s southern borders remained calm and stable, with no significant security incidents reported.

SITUATION OVERVIEW

- Armenia is an upper-middle-income, landlocked, net food-importing country vulnerable to shocks.

Reporting Period: May 2026

Increasingly, Armenia is exposed to regional instability and external market fluctuations, which affect food prices, livelihoods and household purchasing power.

- According to the 2024 National Statistical Service data, the poverty rate was 21.7 percent. While there has been a gradual improvement, food insecurity still persists in rural and other urban areas, except the capital. Overall, the adoption of livelihood coping mechanisms have decreased and the majority of population has the economic capacity to meet the essential needs.
- In line with the Sustainable Development Goals (SDGs), and to implement the Government’s national development agenda, WFP supports the Government and partners in their efforts to eradicate food insecurity and malnutrition.
- Through its [Country Strategic Plan \(2026-2030\)](#), WFP will transition its operations by 2030 towards sustainable national ownership focusing on the transfer of capacities, tools and models to the Government to achieve two integrated outcomes:
 - Outcome 1: Crisis-affected people in Armenia are better able to meet their basic food and nutrition needs before, during and in the aftermath of crises.
 - Outcome 2: The Government of Armenia has enhanced systems, programmes and capacities to strengthen food security and reduce humanitarian needs by 2030.

OPERATIONAL UPDATES

Under the Country Capacity Strengthening agenda, the School Feeding Programme Roadmap has been

finalized, while the Social Protection Roadmap is in the final stages of development.

School Meals Programme

- Under the theme of “peace, love and school meals”, Armenia hosted a high-level event, “Sustainable School Meal Programmes in Global and Regional Contexts”, organized jointly by WFP and the Government of Armenia. Delegations from Kyrgyz Republic, Tajikistan, Brazil, and the Social and Industrial Foodservice Institute from the Russian Federation, together with ambassadors, NGOs and international organizations, engaged in workshops and field visits. The event highlighted school meals as a strategic public investment with multi-sectoral benefits, improving nutrition and education, strengthening local economies and fostering social cohesion. Armenia was positioned as a strong example of Government-to-Government South-South collaboration and knowledge-sharing on nationalizing the School Meals Programme.
- WFP, in partnership with the National University of Architecture and Construction of Armenia (NUACA) and the School Feeding and Child Welfare Agency, conducted joint visits to 22 schools in Yerevan to assess school meal infrastructure, as part of efforts to scale up the School Meals Programme in the capital. Based on these assessments, NUACA will provide construction and renovation calculations for schools, ensuring systematic upgrades.

Social Protection

- Demonstration of the e-learning platform's demo version was conducted, intended to serve as a long-term digital learning infrastructure for the social protection sector. It is designed to support a more structured and scalable model of staff development, offering digital coursework, learning tracking, certification, and analytics. This enables a shift to a continuous, competency-based learning model.

Emergency Preparedness

- WFP, leading an interagency effort with UNICEF and UNHCR, conducted a Market Functionality Index assessment in Syunik region. The tool, supporting market assessment for cash-based interventions, was expanded to include non-food items such as hygiene products and clothing, reflecting emergency priorities. Findings show that markets demonstrate high functionality with no major constraints and capacity to absorb increased demand. Also, preparedness efforts

are being strengthened through the finalization of a standby Field-Level Agreement with the Armenian Red Cross Society.

Resilience and Livelihood Support

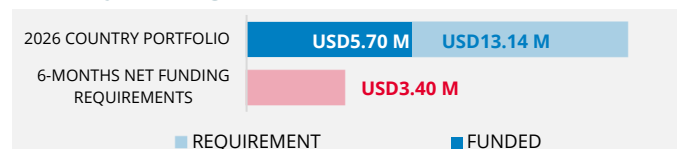

- In the scope of the Socio-Economic Integration of Refugees in Armenia project, WFP supported the installation of solar energy infrastructure in selected schools of Syunik region. These investments directly enhance energy efficiency, reduce the operational costs of school kitchens, canteens and school-based agricultural infrastructure, promote energy independence, and establish a foundation for climate-resilient school feeding systems.

Monitoring and Assessments

- WFP presented the findings of the 2026 Food Security and Vulnerability Assessment to representatives of the Government, embassies and other stakeholders. In 2026, the proportion of food-secure households (33 percent) has significantly increased compared to 2024 (26 percent). Food-secure households among displaced populations stand at 21 percent, compared to 38 percent among local communities. The highest food insecurity rate was recorded in Gegharkunik (29 percent). Overall, 71 percent of the population is able to afford the Minimum Consumer Basket, indicating that their monthly per capita expenditure exceeds AMD 66,989 (USD 182). In April 2026, the Consumer Price Index rose by 5.3 percent year on year. Food Price Inflation rose 9.5 percent compared to April 2025.
- The exchange rate of USD/AMD was AMD 374 per 1 USD in April 2026, down from AMD 391 in April 2025. The RUB/AMD exchange rate stood at AMD 4.8 per 1 RUB, up from AMD 4.7 in April 2025.

FUNDING OVERVIEW

Country Strategic Plan (2026-2030)

Donors - Armenia, Bulgaria, European Union, France, Russian Federation, South-South Opportunity Fund, Switzerland, United States and UN funds.
