

Situation Report

Chad Humanitarian Response

1-31 May 2026

Highlights

- **Refugee arrivals from Sudan slow amid border insecurity:** By 30 May 2026, a total of 928,818 refugees had arrived from Sudan since April 2023, with Ouaddaï hosting the largest number.¹ Arrivals declined in May, likely due to increased border insecurity, including a 26 May drone strike in Al-Tina.²
- **Insecurity and funding shortfalls increase protection risks in Lac:** In Lac Province, non-state armed group (NSAG) attacks on 4 and 6 May triggered new displacements and a state of emergency. Funding gaps have also forced humanitarian actors to scale back services, limiting access to sexual and reproductive health (SRH) and protection services. A security audit across 25 sites revealed that 96% of sites lacked night lighting and 68% lacked latrines, heightening gender-based violence (GBV) risks.
- **Intercommunal tensions restrict access to essential services in Wadi Fira:** Tensions between the Zaghawa and Tama communities persist in Wadi-Fira Province, with clashes in Birak and Marassabré resulting in casualties. The violence undermines social cohesion, restricts population movement, and hinders access to SRH and GBV services.
- **Senior UNFPA leadership visits Chad:** A high-level UNFPA mission visited N'Djamena, Ouaddaï, and Wadi-Fira to engage with government authorities, assess humanitarian needs, convene donor meetings, and review ongoing interventions.
- **90% funding gap:** As of May 2026, UNFPA has only received 10% of funding it requires for Chad, severely restricting life-saving SRH and GBV services for vulnerable women and girls.

Situation Overview

The humanitarian crisis in Chad remained critical throughout May 2026, shaped by shifting migration patterns and worsening security conditions. The total number of refugees arriving from Sudan reached 928,818 by 30 May 2026. Concurrently, new displacements emerged in Lac Province following NSAG attacks on 4 and 6 May, which prompted a state of emergency.

A recent security audit conducted across 25 locations in Lac Province — comprising 21 internal displacement sites, one returnee site, one refugee camp, and two host community villages — revealed critical safety and protection gaps for women and girls. Specifically, 96% of respondents reported a lack of night lighting and 68% of respondents cited a lack of latrines, severely heightening the risk of GBV.

In Wadi-Fira, intercommunal violence between Zaghawa and Tama communities disrupted social cohesion and restricted access to essential services.

Amid these mounting needs, severe funding shortages have forced humanitarian partners to scale back life-saving reproductive health and protection services, leaving vulnerable women and children, representing 85–87% of the refugee population, with critical gaps in support.

UNFPA Response

Sexual and reproductive health

In May 2026, UNFPA deployed 128 midwives in total throughout Chad, 98 of whom are deployed in humanitarian zones across 72 health facilities in the east (Ouaddaï, Wadi-Fira, Sila, Salamat, and Guera), the south (Logone Oriental and Moyen Chari), and the Lac province. The other 40 midwives were deployed in non-humanitarian zones (N'Djamena, Chari Baguirmi, Kanem, and Hadjer Lamis). These 98 UNFPA-deployed humanitarian midwives covered 60% of the total number of antenatal consultations, postnatal consultations, and deliveries provided in these 72 facilities. These midwives provided the following SRH services:

- 10,131 antenatal consultations;
- 2,717 assisted safe births;
- 3,733 postnatal consultations;
- 4,851 women reached with family planning services, including 2,657 new users.

The midwives also supported management of sexually transmitted infections (STIs), clinical management of rape, and the management and referral of obstetric complications.

During the month of May, UNFPA distributed 99 reproductive health kits as well as medical equipment to 14 health facilities across the Wadi-Fira (13 health facilities) and Ouaddaï (one health facility) provinces.

Gender-based violence

Awareness raising: In the Ouaddaï and Wadi-Fira provinces, through implementing partners Comité International Pour l'Aide D'urgence et le Développement (CIAUD) and Association des Femmes Juristes du Tchad (AFJT), UNFPA delivered several GBV awareness and information sessions to 6,305 individuals from the refugee and host community (including 4,539 women and girls). These awareness-raising sessions focused on combating GBV and harmful practices — such

as early marriage and female genital mutilation — by educating communities on the consequences of abuse, safe reporting pathways, and the role of men in creating a safer and more equitable future for women and girls.

Case management: UNFPA provided comprehensive psychosocial support and medical care to survivors through partners and specialized centres. All survivors received psychosocial support, with further medical and legal assistance provided as needed.

Capacity building: In Ouaddaï province, UNFPA's implementing partner, CIAUD, trained 45 service providers (including 17 women) across the medical, psychosocial, legal, and security sectors on GBV case management.

Women and Girls' Safe Spaces (WGSS): During the month of May, UNFPA maintained services in 11 WGSSs across Ouaddaï and Wadi-Fira provinces through its two implementing partners, CIAUD and AFJT. Twenty (20) additional safe spaces in Ouaddaï are managed by other organizations under tents provided by UNFPA.

Results Snapshot

21,432

People reached with SRH services

100% female

72

Health facilities supported

411

People reached with GBV prevention, mitigation and response activities

100% female

31

Safe spaces for women and girls supported

99

Reproductive health kits provided to service delivery points to meet the needs of 11,161 people

6,305

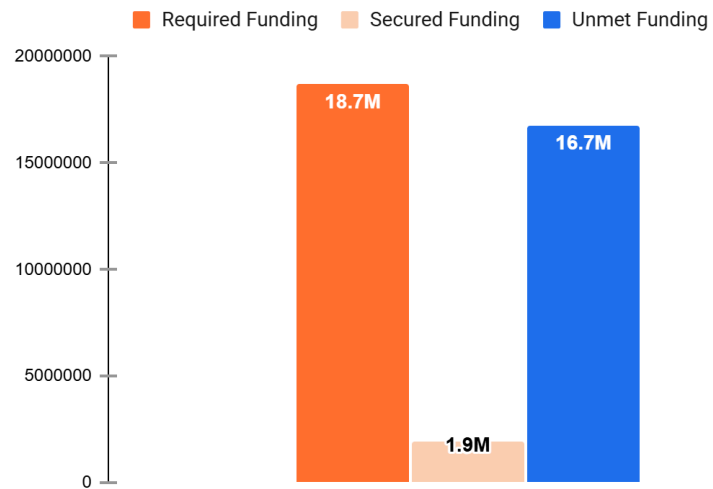

People reached with GBV awareness and education sessions

Funding Status

As of the end of May 2026, UNFPA has secured US \$1.9 million toward its \$18.7 million requirement. Of the funding received, \$500,000 comes directly from UNFPA Emergency Funds and \$1.4 million comprises of funds rolled over from 2025 from the Women's Peace and Humanitarian Fund and the UNFPA Humanitarian Thematic Fund. This leaves a staggering funding gap of 90%.

UNFPA is urgently appealing for critical funding for Chad to address the scale and urgency of the humanitarian needs, particularly for women and girls who require life-saving SRH and protection services.

Disclaimer: Funding available is based on cash received during the current year as well as funding rolled over from previous years, and transfers from/to other UNFPA departments. It does not include funds from agreements that have been signed but not yet received.

“I was scared because the baby came too early. But here, the midwives stayed with me, talked to me, and helped me. It’s better at the hospital.”

— Badria, a 39-year-old Sudanese refugee who gave birth to a premature baby boy at the Iriba District Hospital on 5 May 2026.

Current Donors

- UNFPA Emergency Fund
- UNFPA Humanitarian Thematic Fund
- Women’s Peace and Humanitarian Fund
